### ECLIPSES, 1911.

There will be two Eclipses of the Sun and two Penumbral Eclipses of the Moon.

April 29th.—A. Total Eclipse of the Sun, partly visible as a Partial Eclipse in Eastern Australia. The sun will rise partially eclipsed, the greatest phase being about half-an-hour after sunrise, and eclipse ends at about 7.45.

May 13th.—A Penumbral Eclipse of the Moon, invisible in Australia.

October 22nd.—Annular Eclipse of the Sun, visible as a Partial Eclipse in Australia. The Eclipse begins at 2.45 p.m. and ends at 5 p.m.

November 6th.—A Penumbral Eclipse of the Moon, visible in Australia. First contact with Penumbra, 11.39; last contact, 3.34 a.m., Nov. 7th.

#### Signs of the Planets.

☉ or ☿ The Sun.	♂ Mars.
☾ The Moon.	♃ Jupiter.
☿ Mercury.	♄ Saturn.
♀ Venus.	♅ Uranus.
♁ or ♀ The Earth	♆ Neptune.

#### Signs of the Zodiac.

♈ Aries.	♎ Libra.
♉ Taurus.	♏ Scorpio.
♊ Gemini.	♐ Sagittarius.
♋ Cancer.	♑ Capricornus.
♌ Leo.	♒ Aquarius.
♍ Virgo.	♓ Pisces.

### Fixed and Moveable Festivals and Anniversaries, 1911.

New Year's Day ... ..	January 1	Good Friday ... ..	April 14
Epiphany ... ..	" 6	Easter Sunday ... ..	" 16

St. Patrick's Day ... ..	" 17	Advent Sunday ... ..	Dec. 3
Palm Sunday ... ..	April 9	Christmas Day (Monday) ...	Dec. 25

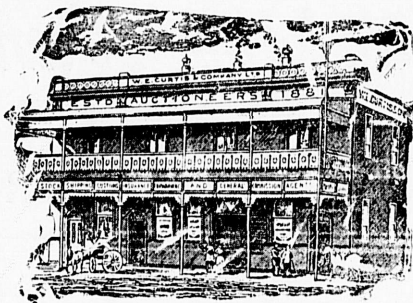

### Chronological Eras.

The Year 1911 corresponds to the year 7419-83 of the Byzantine era; to 5911 of the Jewish era; to 2664 since the foundation of Rome; to 2686 of the Olympiads; to 2574 of the Japanese era; to 1320 of the Mohamedan era, or the era of the Hegira. Julian period 6624.

# THE LEADING AUCTIONEERS, BUNDABERG.

ESTABLISHED 1881.

ESTABLISHED 1881.

## W. E. Curtis & Company, Ltd.

R. G. CURTIS.

F. A. CASTLE.

**Auctioneers, Valuers,  
LAND, PRODUCE, AND LIVE STOCK SALESMEN,  
Hotel Brokers, Shipping, Forwarding, Insurance, and  
GENERAL COMMISSION AGENTS.**

**TO LAND BUYERS AND LAND SELLERS.**—We devote Special Attention to Land Transactions. It is a recognised fact that most of the **Important Land Sales** have been effected by us. Our long connection with the District places us in the best position to advise you.

**CONSULT US.**—If you want to Buy or Sell a House or an allotment. If you want to Buy or Sell a Cane Farm, Dairy Farm, or Grazing Area.

**VALUATIONS.**—Owing to our long connection with the District and the many Land Sales effected by us, we are in the best position to give true values. Our Valuations are always esteemed for their correctness.

**LOANS.**—We have Money to Lend in any sums, on approved Freehold Security. Interest 5 to 8 per cent.

**FURNITURE SALES** conducted either at our spacious Mart or elsewhere as desired. All the Important Sales have been entrusted to us.

**WEEKLY AUCTIONS.**—We hold Auction Sales every Saturday morning of Furniture, Produce, Fruit, Pigs, Poultry, &c. Consignments received and Returns promptly rendered.

# BUNDABERG :

## Its History, Progress, and Public Institutions.

HE town of Bundaberg is of comparatively recent origin; but long before it became the comprehensive commercial, industrial, and maritime centre we find it to-day, it had a somewhat romantic history. As long ago as the early sixties the people of Gayndah—the then commercial capital of the Burnett, and centre of an important sheep-breeding and wool-producing district—held very diversified opinions as to whether the stream called the Burnett River there had an opening to the sea or not, and where? Some inclined to the belief that it became the Boyne and entered Port Curtis; others that it had an eastern outlet into the Pacific Ocean. At this period the squatters of the Burnett were seeking new country for their expanding flocks; some went north-west and occupied the land fringing Port Curtis; others went eastward. But some authoritative information was desired as to how to proceed, and after pressure had been brought to bear on the powers that were, an official was despatched from Maryborough about 1862 to endeavour to find and report on the mouth of the Burnett—if such existed. That official went, and returned with the information that the mouth of the Burnett was a small bay with a narrow rock-barred entrance, and perfectly impracticable for navigation. It can now be easily seen that gentleman never reached the Burnett; but his description was a fairly accurate account of the Elliott River mouth, twelve miles south of the Burnett. This, however, did not satisfy the people of Gayndah, and in 1863 Mr. Alexander Walker despatched his cattle down the river. The journey was arduous and dangerous on account of the natural enmity of the lower Burnett aborigines to the bush natives, who acted as guides to the few Europeans in charge of the cattle. But the difficulties were overcome, and Bingera Station, fourteen miles from the after Bundaberg, was formed. The surroundings of the later township settlement were of a most uninviting character—dreary forest and stunted-grass wattle country offered no inducement to a pastoralist; while that awful bugbear (from a squatter's point of view), the now famed Woongarra Scrub, blocked cattle progress coastwise. Not to be outdone, some of the adventurous party made their way down stream in a native canoe, and were rewarded by finding our wide stream opening into Hervey's Bay between two sandspits, dignified

now by the name of the Burnett Heads. Three years later others were casting around for some indication as to what the Burnett really mean. In 1866, Baffle Creek, 53 miles to the northward, possessed a boiling-down establishment, and the Messrs. Stewart made their way across in search of timber suitable for staves. After six weeks of exploration, they brought up at what subsequently became North Bundaberg. Here, a few months afterwards, they were joined by Mr. Thos. Watson, and the labor of settlement commenced. In 1867, the Messrs. Stewart selected 320 acres, under the Coffee and Sugar Regulations of 1862, in a dense scrub named Woondooma, and practically the site of North Bundaberg of to-day. Thus they became virtually the pioneers of a prosperous settlement, then unnamed. Mr. Watson followed with another 320-acre selection, which he called Mabbro. Being in the midst of a bountiful supply of timber, the building of habitations became an easy task to these hardy forerunners of civilisation. There was no communication of a fixed sort at this time—the only means of correspondence with the outer world being by special messengers to Gin Gin, a considerable journey in those days. But matters began to move along. Men arrived from other parts of the district, and in 1867 the ketch Elizabeth, commanded and owned by Mr. T. Miller, navigated the Burnett. This vessel brought machinery for a sawmill, which was erected but never worked. Another attempt was made the following year; but before that year closed Mr. S. Johnston arrived from Rockhampton, and securing a site from Mr. Watson, started the Waterview Sawmill. By perseverance, he succeeded in achieving deserved success. The population in 1867 comprised five at Tantitha, two at Bingera, and three at Kolan. There were none at all on the south side. In 1869 an exploring party made their way to Maryborough *via* the Burrum, and blazed a track, which considerably lessened the route *via* Eureka. In 1870 the rapid development of the copper industry at Mount Perry created a desire to reach its natural port. A long line of business places soon sprang into existence—hundreds of miners were employed, and smelting furnaces erected for reducing the ore to refined copper. The road to Maryborough was at all times heavy, whilst the wide, rocky crossing of the Burnett at Mingo (sixteen miles from Mount Perry) became impassable for weeks by every freshet. The way out and over the giant ranges eastward was pronounced impracticable, but Messrs. Knight and Finch found a way by the Kolan, and eventually others got into North Bundaberg. Despite the impracticableness of this route, the carriers preferred it at £5 a ton to accepting £8 to Maryborough. The route being established, a wharf was erected on the north side, and the Australian Steam Navigation Company induced to send steamers there. Buildings were soon erected, and all the attributes of a township quickly appeared. There was no Government township set apart on the north, the official site being reserved on the south side. It is difficult now to realise that these events happened so short a time ago; and new comers can form but small idea of the inconveniences of the early residents of this Bundaberg of 1911.

BUNDABERG is situated on the south bank of the Burnett River, about ten miles above its debouchure into Hervey Bay, 180 miles north of Brisbane. It is in latitude 24 deg. 54 min. south, and longitude 152 deg. 28 min. east. The site, in consequence of its higher elevation and suitability for

building purposes, was deemed superior to anything in the original settlement on the north bank. Mr. Surveyor Thompson made an excellent survey, the leading thoroughfare, called Bourbon-street, being two chains in width, and running east and west from Saltwater Creek to O'Connell Creek; the other streets are a chain and a half wide. The first sale of town allotments was conducted in Maryborough in 1871; but the upset price of £4 per  $\frac{1}{4}$ -acre militated against a complete sale, and so in the following year the balance was offered at from £2 to £4 per allotment. These, in many instances, within fifteen years changed hands at from £1,000 to £4,000; whilst £9,000 was offered and refused for a corner allotment in Bourbon-street. This increased value was not due to any extraneous discovery such as gold, but grew in consequence of Bundaberg's steady advance in the development of its agricultural resources. The actual rise of the town did not take place until 1875; in this year the first symptoms of progress were manifested by the establishment of the *Bundaberg Star*, a weekly newspaper (now incorporated with the *Bundaberg Daily News*), taking the Liberal side of politics, and which speedily brought into prominence the requirements of the 200 people who formed the population. In the same year the *Mount Perry Mail* (now the *Bundaberg Mail*, which is published daily) announced its intention of removing to the Burnett port, where it was first published in February, 1876. Representing the other side in politics, the voice of the settlers was made to resound from both sides of the question. Beyond a body of earnest workers, termed a Progress Committee, there was no representative organisation to obtain redress from the metropolitan rulers. It is impossible for those who see our wide, gas-lighted, macadamised, tree-planted thoroughfares of to-day to form any idea of what the place was like in those days, with its uncleared and creek-intersected streets. Events moved rapidly—agriculture expanded, industries were founded, maritime commerce augmented, and in five short years Bundaberg became one of the best known places on the Queensland coast. In that period the annual tonnage of vessels increased from 10,000 to 60,000, and the revenue of the port from £1,200 to £4,000. A Chamber of Commerce, Agricultural Society, Planters' and Farmers' Association, and other representative bodies, led to create an interest in the welfare of the town. In 1879 the Progress Committee merged into the Bundaberg Divisional Board, which in April, 1881, was superseded by the Municipal Council. There is nothing of a convincing nature to strike the visitor by rail from the south as to why Bundaberg should be the important centre it undoubtedly is, because the agricultural source of wealth is not met with; but those arriving from seaward catch a glimpse of the rural enterprise even before crossing the bar, and on either side as they proceed up stream.

#### Public Buildings.

The Post and Telegraph Office is a handsome two-storeyed brick structure, with a 90-feet clock tower, in which is set a four-dial timepiece, visible from any part of the town. The tower is surmounted with an ornamental palisaded turret and dome, from which an excellent view of the town and surroundings may be obtained. The building was erected in 1890, at a cost of £7,500. Besides the post, telegraph, and telephone departments, portions of the building are occupied by the New Caledonia Cable Company.

The Custom House is an attractive two-storeyed building, erected at the corner of Quay and Barolin-streets, at a cost of over £5,000. The lower portion is utilised for all matters connected with customs, excise, and shipping transactions, whilst the upper floor provides fine dwelling quarters for the Sub-collector of Customs. It was opened for public business in August, 1902.

The School of Arts is an architecturally handsome two-storied brick building, erected at a cost of £3,500, and opened on June 17th, 1889. It is replete with current literature, whilst the well-lighted, balcony-surrounded reading room and general conveniences are the admiration of members and visitors. A detached technical hall is used for its named purposes, and is highly appreciated by those desirous of improving their mental and practical knowledge. The library contains over 9,000 volumes, including all the latest works. There is also a museum connected with the institution, containing many objects of interest, which will afford a pleasant half-hour to visitors.

The Hospital was originally erected by the Government at a cost of £1,000, but enlargements and improvements have been effected, until it has reached the pretty, horticulturally-surrounded set of buildings in the West End. Dr. T. H. May, M.D., and an efficient staff of trained nurses attend to the hundreds of cases which are now dealt with annually in this admirable institution. The number of wards are—males, 7; females, 5. Beds—males, 42; females, 21. The erection of an up-to-date two-storey brick structure on a portion of Queen's Park, in the West End, will shortly be proceeded with, and will probably be completed before the end of the present year.

There are five banking institutions, two of which—the Commercial and Queensland National—are handsome two-storied brick structures. The hotels, numbering twenty-one, are for the most part well-appointed two-storied buildings. There are two sawmills, one distillery, a brewery, butter factory, pottery works, sash and door factories, four cordial manufactories, several coach works, and the Gas Company's extensive works. The Bundaberg Foundry is a splendidly equipped mechanical establishment, employing a large number of hands, and is constantly being added to. Buildings used as places for entertainment comprise the Queen's Theatre, Austral Hall, and Oddfellows' Hall. There is an excellent Fire Brigade, managed by a Board, consisting of representatives of the Government, the Town Council, and the fire insurance companies, and maintained from funds contributed in equal amount by the governing authorities. The Ambulance Brigade has splendidly justified its existence. Besides the paid officers there are honorary bearers, who give much of their time in cases of emergency.

#### **Railway Facilities.**

Bundaberg is connected by railway in a very complete and comprehensive manner. A daily train runs to and from Brisbane, and a night mail from the metropolis to Rockhampton arrives and departs from Bundaberg four times a week. There are two trains daily to Maryborough and the Isis, and a daily train to Mount Perry on the western line. Besides these there are numerous special trains, and regular trains during the sugar season, adding considerably to the despatch of mails. An extension of the Mount Perry line westward from Wolca is being urgently

advocated, and it is hoped that at an early date the powers that be will take definite steps for the building of this line, which will open up a large area of high class land for closer settlement.

### **Bridges.**

In the matter of bridges Bundaberg is certainly well ahead. Besides a fine iron railway structure across the Burnett, a splendid steel bridge was opened on the 24th August, 1900, by Lord Lamington. This bridge (named the Burnett) is the longest steel traffic structure in Australia, and was erected at a cost of £60,700. The bridge consists of eight 170-foot spans of steel girders carried upon two concrete abutments and seven piers, having two cast iron cylinders each. The total length of the bridge over abutments and wing walls is 1,430 feet 4 inches, and the waterway or clear length between the faces of the abutments, 1,352 feet 4 inches. The bridge is level throughout its length, and the height of the roadway above high-water is 33 feet. The Kennedy Bridge is also a fine single-span steel structure, crossing Saltwater Creek, erected at a cost of £7,000, and opened on November 25, 1899.

### **Harbour and River.**

The Burnett, like other Queensland rivers, is subject to periodical floods, which make river improvements a task of anxiety and uncertainty. The Harbour Board, however, are ever watchful of the interests of the port by keeping the river well dredged, which should greatly facilitate shipping calling at our port. The Board possess the latest style of suction dredge (the Ceratodus), which cost £20,000, and it has done good work; a slipway has also been constructed by the Board for the docking of vessels at a cost of over £4,000. The regular steamers calling at the port are those of the A.U.S.N. Co., and Wm. Collin and Sons, Ltd.; whilst during the sugar season other boats call occasionally.

### **Churches and Religious Institutions.**

In 1875 there were no church buildings, and the few religious services held took place in a very modest building, which did duty as School of Arts, or in an unpretentious structure called the Pioneer Schoolroom. In 1876 the Roman Catholics erected a place suited to the requirements of the congregation. This was followed in due course by other denominations, until the edifices now comprise—Christ Church (Woongarra-street), St. Paul's Church (North Bundaberg), and St. John's Church—all Anglican; St. Mary's, Roman Catholic, Barolin-street; St. Andrew's Presbyterian, Maryborough-street; Methodist Church, Barolin-street; Gospel Hall (Brethren), Crofton-street; Lutheran, South-east Bundaberg; Salvation Army, Tantitha-street; and Seventh Day Adventists, South Bundaberg. There is also a Mission Hall in South Bundaberg, and the Presbyterians and Anglicans have School Halls in East Bundaberg.

### **Friendly Societies and Associations.**

In 1875 the introduction of friendly benefit societies commenced with the Good Templars and Orange Lodges, followed in 1876 by the Loyal Mutual Aid Lodge, Manchester Unity Order of Oddfellows; then came the Protestant Alliance Friendly Society (Prince Arthur Lodge, No. 12), Rechabites, Independent Order of Oddfellows (American), and the Hibernian Catholic Benefit Society, each commencing with a few members, and advancing until in 1910, they total over 2,000 members. Other

bodies, not purely of a benefit character, are represented by the Masons—Tyrian and Sir Augustus Lodges (English), Mulgrave (Irish), Lodge Athole (Scotch), the Waratah and Tyrian Royal Arch Chapters, and Bundaberg Mark Master Masons—and the Bundaberg-Musgrave Caledonian Association and Royal Society of St. George. In addition to these there is the Agricultural, Pastoral and Industrial Association, which holds annual shows. At these exhibitions live stock is always well represented, whilst the various agricultural products of the district make a brave show. The Ladies Benevolent Society is also one of the standard institutions of the town, and is well managed by a committee of ladies. The Gordon Club, Racing Club, Bowling Club, and Golf and Tennis Clubs are institutions which afford their many votaries much pleasure and hearty recreation.

### Bundaberg Waterworks.

The source of water supply for the town is a stream fed by numerous springs, situated at East Bundaberg, and called Baldwin's Swamp. The

**WATER TOWER.**

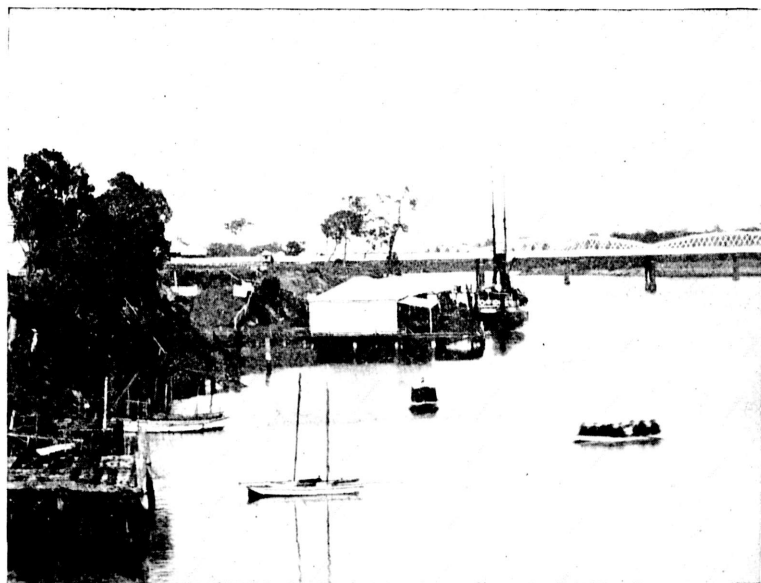

springs have never been known to fail, and yield an overflow estimated at two million gallons per diem. Water is drawn direct from the supply and then forced into a tower situated a short distance from the pumping station. The water-tower forms a prominent feature in the surrounding landscape; it is built of brick, circular in shape, 104 feet in height, and 36 feet base diameter, and is surmounted with a steel tank, 11 feet 9 inches high, 27 feet in diameter, and weighing 11 tons, having a concave bottom for cleansing purposes. The chief mains are 10 in. pipes, and fire-plugs are placed at convenient distances along the pipe-track. The work was carried out by the Municipal Council at a cost of £22,500, obtained by loan from the Government.

### Political.

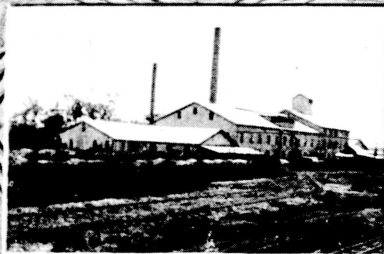

When the electorate was called the Mulgrave, and included Mount Perry, we were represented in the Legislative Assembly by Mr. W. Scott. In 1878, Sir Thomas M'Ilwraith was elected over the local candidate, the Rev. Edward Tanner. In 1883, Sir Thomas was re-elected; he resigned in 1886, when the late Mr. Walter Adams was elected, defeating Mr. J. C. Walker. In 1888, the electorate was divided into the Bundaberg and Musgrave electorates—Messrs. W. Adams and W. B. H. O'Connell being returned unopposed. On Mr. Adams' death in 1892, Mr. G. J. Hall was elected for one year; but in the general election of 1893 he was defeated by Mr. M. Duffy. In 1896 Mr. Duffy was defeated by Mr. T. Glassey, then leader of the Labour Party; and in 1899, Mr. Glassey was re-elected,

defeating Mr. C. Powers. In 1900, Mr. Glassey severed his connection with the Labour Party, and resigning his seat, re-contested it with Mr. A. Hinchcliffe, whom he defeated. In 1901, Mr. Glassey was elected as a Senator in the Federal Parliament, and resigning his seat in the State Parliament, Mr. G. P. Barber was elected, defeating Mr. M. Duffy. In 1902 he was re-elected, defeating Mr. J. White; at the general election in 1904 was re-elected, defeating Mr. W. E. Curtis; at the general election in 1907 was again re-elected, defeating Mr. M. Duffy; and was again successful at the general elections in 1908-9, defeating Mr. C. Stumm.

### THE SUGAR INDUSTRY.

Bundaberg is recognised as the head centre of the Queensland sugar industry; but it took years of agricultural settlement to bring that product into prominence. In 1878, Messrs. Cran visited the town, and sought the co-operation of those desirous of planting cane. Matters being satisfactorily fixed, in 1881 a contract was let for the supply of 400,000 bricks for that vast establishment, Millaquin Refinery, which was erected at an original cost of £160,000, and active operations commenced in 1882. Since its erection many improvements have been made. Originally it dealt with 100,000 gallons of juice per diem, conveyed from numerous crushing mills through thirty miles of mains to the capacious reservoirs within the works. The output of sugar was 60 tons in 24 hours. Apart from the juice supplied by local mills, raw sugars are purchased from mills in different localities, which keep the works going throughout the year. The Waterview Estate and Qunaba Plantation have been absorbed by the proprietary, and other projects added to this large labor-employing establishment, now represent a greatly enhanced capital value. The utilisation of by-products, preparation of composts, and other requirements connected with the industry afford employment to hundreds of white workmen in all seasons. During 1906 the proprietary erected a new sugar mill at the Refinery, and the cane which has hitherto been crushed at Oakwood and Waterview is now treated there, while the old mills are closed down. The new mill is a powerful one, with 6 ft. rollers, and capable of treating from 35 to 40 tons of cane per hour. In 1907 further extensive additions were made, including the erection of a new three-roller crushing mill, which is said to be the largest, heaviest, and most powerful cane crusher in the Commonwealth. It is of massive design, and is fitted with a most effective "pusher" attachment for ensuring regular feeding to the rollers. The addition of so powerful a mill to this already massive plant means that the Company, under the able management of Mr. J. Johnston, will be equal to coping with vastly increased cane supplies. The whole works are now lighted with electricity, the plant consisting of a Westinghouse high-speed engine and generator capable of supplying 600 lights within the buildings, in addition to several arc lights outside. Since the establishment of Millaquin, the capital as originally invested may be estimated at more than double the above quoted figures. The output of white sugars from this Refinery during the season 1910-11 will be 25,000 tons, besides syrups and treacles, the weekly output varying from 750 to 800 tons refined sugar.

Early in 1880, Messrs. Young Brothers purchased Fairymead, 3,200 acres, and the erection of manufacturing machinery quickly followed.

Starting with a mill expenditure of £40,000, this was increased to £70,000, and a network of tramlines were constructed to bring cane to the mill. But as time advanced, so did development, and Messrs. A. H. and E. Young exhibited their faith in this enterprise by not only adding to the effectiveness of their manufacturing plant, but in largely adding to their estate by the purchase of other areas of land. Beside their valuable area at Avondale, connected with the Gladstone railway by seven miles of permanent way, they secured important blocks in the Isis, notably Hapsburg and Lynwood, making an available, if disjointed, domain of some 6,000 acres. The cane from the Isis is railed to Fairymead, a distance of 47 miles, thanks to the triangular method of railway survey which places Hapsburg double the distance from the Bundaberg station as it is by cross-country travel. At Fairymead there is installed an ingenious and effective system of irrigation, whereby the under-surface water is tapped by tubes, and distributed by pumping over a large portion of cane land. By this means the likelihood of a crop is increased, and the owners rewarded for the expenditure involved. Necessarily, these important extensions have caused additional and costly alterations and enlargement of the manufacturing portion of the business, the required facilities to cope with the augmented operations of activity, and accommodation for an ever-increasing staff of employees. Thus it may be seen that the figures attached to Fairymead can be put down approximately at over £200,000.

In 1884, Messrs. Gibson and Howes purchased 2,300 acres at Bingera, and erected a mill thereon. This mass of engineering skill, comprising all the latest appliances, commenced work in 1885, the total expenditure representing over £75,000. Since then, however, large amounts of capital have been expended in various ways necessary to the extension and completeness of a well-devised and capably managed business of this calibre. Year by year, despite climatic drawbacks, the cane-planted plots were extended, convenient properties acquired, and The Cedars and Watawa Estates brought into the theatre of Bingera's ramifications. To cope with the coquetry of atmospheric conditions, an irrigation plant of costly design and practical usefulness was installed at a cost of £40,000. By this means the water of the Burnett River above the falls is forced into huge reservoirs and reticulated by pipes and channels through two thousand acres of cane land, with much power of expansion as the needs demand. The land is worked by steam plows, and the recent additions to the estate comprise Nolan's Pocket and Givelda, for which an extension of 12 miles of line was necessary and a bridge across the Burnett River. White labor is now exclusively employed both in the field and factory. The estates spread over an area of 5,000 acres, intersected and served by 35 miles of tramline, whereon the reverberating roll of many locomotives denote the hustle and strenuousness of the life connected with an estate now far-famed and the object lesson of admiring visitors. In 1904 the firm was formed into a company under the title of Gibson and Howes Limited, with a capital of £175,000, and the capital is more than represented by the wonderful completeness and soundness of the comprehensive improvements visible on all sides.

Then, as complete plants, there are Windermere, Pemberton, Qunaba, Ashfield, Miara, Sunnyside, Springhill, Bonna, Invicta, Tegege, Woodlands, and the Gin Gin Central.

In 1888, exclusive of Millaquin, there were twenty-four complete and fourteen crushing mills. These manipulated the produce of 12,000 acres of land. The capital invested in these plantations, including machinery, rolling stock, etc., was estimated at one million sterling; and the cost of clearing the land and planting the first crops is stated to be £120,000 more. From then until the present time there has been a constant increase in the acreage treated and capital invested. The cultivated land occupies nearly double the space it did in 1888, whilst the capital involved in the various projects to further the sugar industry may be approximately reckoned at about £2,000,000.

The Federal Parliament in the session of 1905 enacted new and varied conditions. By the measure adopted bounty payments on white-grown cane were fixed at 4s. per ton, but have since been altered to 6s. per ton of cane of 10 deg. Baumé density, with proportionate increase or decrease on points above or below that standard. Excise was raised from £2 to £3 per ton of manufactured sugar.

Sugar factories must be licensed, and annual fees paid as follows:—Juice mill, £5; factory where sugar is manufactured, but not refined, £5 for every 500 tons; factory where sugar is refined, £200. Producers must furnish annually a return stating particulars as to number of acres on which cane is grown, the weight of cane, how disposed of, etc.

The following are the rates of wages to be paid for white labour under the Sugar Bounty Act of 1905:—During off-season, 22/6 per week and found; for harvesting, 25/- per week and found; boys under 16, 10/- to 15/- per week and found; youths from 16 to 18 and old, infirm, or non-able-bodied men 15/- to £1 per week and found.

The returns for Bundaberg and Gin Gin for 1909 were as follows; area for plants, 198 acres; area stand over or unproductive, 6,786 acres; area crushed for sugar, 15,724 acres; total area for sugar cane, 22,708 acres; weight of cane crushed, 186,020 tons; sugar manufactured, 19,356 tons; molasses, 622,569 gals.; tons of cane per acre crushed 11.83; tons of sugar per acre crushed, 1.25; tons of cane per ton of sugar, 9.77; decrease of sugar yield over 1908, 7,721 tons; decreased area, 2,593 acres.

### Mining.

GAETA.—Very little has been done at Gaeta, the gold mining leases having had exemption during the whole of 1909. At the end of the year the mines were being unwatered, and work preliminary to getting a start made was done, also general clearing up work, and stone will shortly be raised.

REID'S CREEK.—No mining work has been done here, the whole field being abandoned.

BOOLBOONDA.—There are several mines on this field, and the Federation claim is expected to give good results shortly. During the year 1909 the Fanny claim was purchased by a Scottish syndicate. It was then applied for under different tenure, viz., mineral lease, and subsequently transferred to Messrs. Flower and Hart, representatives of the Syndicate, with Mr. Kenney as general manager. This was looked upon as a very good augury by the residents in the locality, and although hardly enough time has elapsed to express any definite opinion, it is anticipated that good results will be obtained. Besides this, several

other leases have been taken up by the same lessees (one being for smelting works and one for tramway), while a water right has been obtained in respect of one of them. Speaking generally, more ore was raised on this field during 1909 than in the past, the advent of the Syndicate giving a fillip to the locality and making the outlook brighter. The Queensland Copper Company's New Moonta mine is situated on this field, as well as another of their properties, which has been worked by tributors.

**EIDSVOLD.**—During the past year the Burnett Gold Mines Limited have been progressing very satisfactorily. Some very good ore has been raised, and the Company are about to have 10-head of stampers repaired and put into commission as early as possible, when it is anticipated that good results will be obtained. There are no other mining operations of any importance in progress on this field.

### Statistical Returns for 1909.

**POST AND TELEGRAPH OFFICE.**—Mails received and despatched, 51,402; increase 3524; letters and postcards, 2,062,942; increase, 1,254; registered articles, 31,584; decrease, 1,302; packets, 757,266; increase, 89,862; newspapers, 1,828,868; decrease, 112,334; parcels, 24,766; increase, 1263; telegrams, 75,480 issued; decrease, 99. Savings Bank—Deposits and withdrawals, £126,174; decrease, £4,501. Money orders issued and paid, £24,894; decrease, £995. Postal notes issued and paid, £14,443; increase, £697. Sale of postage stamps, £10,009; decrease, £328. Duty stamps and impressed forms, £622; increase, £81. Duty collections on parcels, £80; increase, £37. Telephone fees, £1,607; increase, £208. Private box and bag fees, £108; increase, £44; Old Age Pensions (from 1st July, 1909), £2,336. Total monetary transactions, £180,273; decrease, £2,421.

### BUNDABERG HARBOUR BOARD.—IMPORTS AND EXPORTS.

1902.—Imports: 5,693 tons raw sugar, 1,456 tons limestone, 848 tons maize, 833 tons, chaff, &c., 17,408 tons sundries; total, 26,238 tons. Exports: 20,233 tons sugar, 1,648 tons copper, 1,613 tons timber, 1,232 tons molasses, 6,545 tons sundries; total, 31,271 tons.

1903.—Imports: 8,467 tons raw sugar, 14,149 tons sundries; total, 22,616 tons. Exports: 7,250 tons sugar, 3,020 tons copper, 1,818 tons timber, 1,350 tons maize, 4,004 tons sundries; total, 17,442 tons.

1904.—Imports: Total imports, 19,174 tons. Exports: 22,560 tons refined sugar, 5,016 tons raw sugar, 2,147 tons copper, 1,284 tons timber, 3,009 tons sundries; total, 34,016 tons.

1905.—Total imports, 23,548 tons. Exports: 22,090 tons refined sugar; 7,228 tons raw sugars, 2,181 tons copper, 1,662 tons timber, 915 tons syrup, 3,998 tons sundries; total, 38,075 tons.

1906.—Total imports, 26,616 tons. Exports: 24,143 tons refined sugar, 12,075 tons raw sugars, 1,441 tons syrup and molasses, 2,968 tons copper, 1,338 tons timber, 950 tons rum, 1,763 tons sundries; total, 44,678 tons.

1907.—Total imports, 33,127 tons. Exports: 26,498 tons refined sugar, 10,398 tons raw sugar, 1,822 tons syrup and molasses, 4,084 tons copper, 4,238 rum, timber, and sundries; total, 47,040 tons.

1908.—Total imports, 27,127 tons. Exports: 25,680 tons refined sugar; 6,425 tons raw sugar, 3,366 tons syrups and molasses, 3,055 tons copper matte, 1,498 tons rum and spirit, 465,807 sup. feet timber, 2,064 tons sundries; total, 43,055 tons.

1909.—Total imports, 26,221 tons. Exports: Copper matte, 1,747 tons; rum and spirits, 1,355 tons; timber, 1,746 tons; coal, 2,376 tons; sundries, 1,635 tons; refined sugar, 14,924 tons; syrups, molasses, &c., 1,833 tons; raw sugar, 1,637 tons.

**MUNICIPALITY OF BUNDABERG.**—Proclaimed 22nd April, 1881; area, 1½ sq. miles; population, 5,500; number of dwellings, 1,500; extent of streets, 30 miles; number of ratepayers, 850; capital value of rateable property, £163,633; receipts,

£6,461; expenditure, £6,843; liabilities, £17,505; assets, £3,364; loans from Government, £18,098. WATERWORKS.—Installed September 20th, 1902; capacity of reservoir, 6,830 cubic feet; pumping power, 960,000 gallons per day of 24 hours; cost of construction, £25,411; receipts, £1,925; expenditure, £1,900; assets, £14,117; liabilities, £21,486.

BAROLIN SHIRE.—Area, 226 square miles; population, 1,820; number of dwellings, 304; number of ratepayers, 667; receipts, £1,769; expenditure, £2,052; assets, £694; liabilities, £2,054; capital value of rateable property, £133,527.

GOOBURRUM SHIRE.—Area, 522 square miles; population, 4,670; number of dwellings, 720; number of ratepayers, 795; receipts, £1,943; expenditure, £2,669; assets, £2,150; liabilities, nil; capital value of rateable property, £271,402.

WOONGARRA SHIRE.—Area, 35½ square miles; population, 3,200; number of dwellings, 650; number of ratepayers, 780; receipts, £2,741; expenditure, £2,887; assets, £1,816; liabilities, £5,770; capital value of rateable property, £203,863.

SHIPPING.—Number of vessels entered, 179; crews, 2,761; total tonnage, 60,989. Number of vessels cleared, 178; crews, 2,729; total tonnage, 59,991.

CUSTOM HOUSE.—The total imports and exports for the year 1909 were—Imports, £134,296; decrease over 1908, £31,361. Exports, £261,569; decrease over 1908, £235,052. Total trade, £395,868.

AGRICULTURE.—The total area of land under crop in the Bundaberg district was 23,429 acres; of which maize occupies 3,669 acres; potatoes, 60 acres; pumpkins and melons, 11 acres; sugar cane, 18,025 acres; hay, 701 acres; green fodder, 521 acres; gardens and orchards, 275 acres; other crops, 32 acres. Production—Sugar cane crushed, 12,644 acres for 149,602 tons of cane; maize, 87,780 bushels; potatoes, 121 tons; pumpkins and melons, 86 tons; hay, 1,543 tons; grapes, 58,736 lbs.; bananas, 2,817 bunches; pineapples, 6,164 dozen; oranges, 9,129 bushels. Value of farming plant, £45,167; dairying, £3,387; irrigation, £27,770; total, £76,339. Labour—farming, 1,651; dairying, 354.

DAIRYING.—Establishments handling cream, 449; milk dealt with, 1,015,518 gals. butter made—factory, 249,220 lbs.; farmers, 106,577; total, 355,797 lbs.

LIVE STOCK.—The numbers of live stock for Bundaberg district were as follows:—Horses, 8,332; cattle, 31,968; sheep, 507; pigs, 1,735.

SCHOOL OF ARTS.—Number of volumes, 9,430; subscribers, 230; receipts, £460; expenditure, £430. Technical College—receipts, £1,035; expenditure, £1,027.

BENEVOLENT SOCIETY.—Receipts: Subscriptions, £18; from Government, £127; total, £148. Expenditure, £199.

HOSPITAL.—Number of Wards, 12; number of beds, 63; patients admitted, 414; discharged, removed, or died, 416. Receipts, including £1,500 Government endowment, £3,035; expenditure, £2,900.

VITAL STATISTICS.—Births: 289 males, 234 females, total 523. Marriages, 139. Deaths: 84 males, 50 females, total 134.

DISTILLERIES.—Bundaberg Distilling Co.: Proof gallons distilled, 336,958.7.

# H. T. Christsen & Co.,

**GROCERS,**

**IRONMONGERS, WHOLESALE WINE & SPIRIT MERCHANTS.**

**Shipping and Custom House Agents.**

IMPORTERS of Oilmen's Stores, Ironmongery, Glass, Earthenware, China, Basketware and Lampware.

Cash Buyers of all Colonial Produce, Hides, Tallow, and Sheepskins.

**BOURBON STREET, BUNDABERG.**

## Local Government Offices and Public Institutions.

### Post and Telegraph Office.

Postmaster, W. A. Uhr; A. Kelly, mail officer; G. M. Casey, telegraphist; C. H. Eales, clerk; H. M. Crow, clerk; J. T. Moore, telegraphist; Geo. Sockhill, assistant; J. Manson, sorter; J. Burchell, line repairer; W. A. M. Goodwin, instrument fitter; J. D. Byrne and J. Crane, telephone attendants; four letter carriers and three messengers.

### Government Savings Bank.

Officer in charge, W. A. Uhr; teller, Charles Eales. Open daily from 10 a.m. to 3 p.m., and on Saturday from 10 a.m. to noon, and on Saturday evenings from 7 to 8.

### New Caledonia Cable Co.

Manager, Victor Nogues; operators, Auguste Percehays and John Mills; assistant, H. M'Adam.

### Lands Office.

Land Agent, W. J. Monteith; Crown Lands Rangers, H. V. Franklin and A. E. Winterford. District Forest Inspector, C. Ladner. The Land Court sits the second Wednesday in each month at 10 a.m.

### Police Offices.

Police Magistrate, Warden, Licensing Justice, Deputy Sheriff—H. Morris. Clerk of Petty Sessions, Registrar District Court, District Receiver in Insolvency, Registrar of Births, Marriages, and Deaths, and Agent for the Curator of Intestacy and Insanity—A. E. Aitkin. Clerk, C. F. W. Copas. Sheriff's Bailiff—A. S. Austin.

Police.—Central: Officer-in-charge, Sub-Inspector Brett; Senior-Sergeant O'Brien, First-class Constable Newman (C.I.B.), Sergeants O'Neill and Griffin, and Acting Sergt. C. Dwyer; watch-house keeper, Constable Dunn; and six constables. South Bundaberg—Constable Berne; North Bundaberg, Acting-Sergt. Slattery.

### Licensing Bench.

H. Morris, P.M. (chairman); Jas. Drinan, A. P. Barton Dr. T. H. May, H. St. G. Caulfeild, W. F. Marshall, M. Dunn; R. Ruddell (Town Council), F. Whittington (Gooburrum Shire Council), P. L. Elliot (Woongarra Shire Council), James St. Ledger, (Barolin Shire Council). The Court sits first Wednesday in every month at 10 a.m.

### Harbour Board.

President, John Fleming; J. Johnston, W. Wyper, A. E. Avenell, R. S. Aiken, H. E. B. Young, A. A. McGill, H. A. Skyring, and W. Barriskill. Secretary, John W. Anderson, F.I.A.Q. Assistant, J. A. Novakoski. Dredge Engineer, John W. Knowles. Wharfinger, F. Cogan. Foreman of Works, J. Cullen. Meetings are held every second and fourth Tuesday in each month at 8 p.m.

### Customs Office.

Sub-Collector, Registrar of Shipping, and Shipping Master—George H. Bennett; Senior Clerk, A. S. Booker; Clerks, E. C. Houston, R. Morton, and C. C. McGibbon; Assistants, J. O'Callaghan and A. Bell; Inspectors of Excise, H. E. Ashley and R. B. Downie; Cane Inspector, D. W. Toon; Storeman, Chas. H. Crick.

HARBOUR OFFICE—Harbour Master, Shipping Surveyor and Pilot, J. W. Jones.

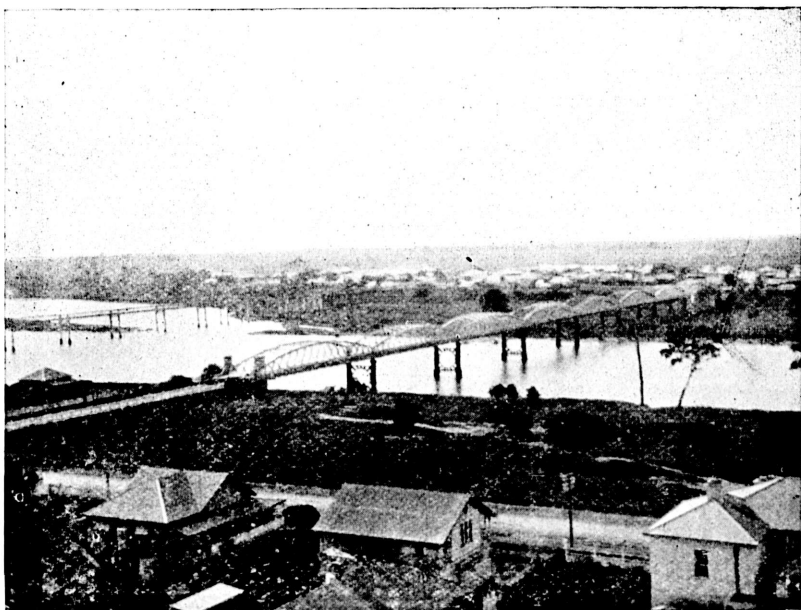

### School of Arts and Technical College.

President, Geo. H. Bennett; Vice-Presidents, H. S. Skyring and W. F. Marshall; Committee, Dr. May, F. W. Payne, L. H. Maynard, H. St. G. Caulfeild, Tom Penny, H. N. Thorburn, and W. B. Alford. Secretary, W. G. Lewis; assistant, Miss J. Henderson. Committee meetings are held on the first Friday in each month at 8 p.m. The Library is open daily from 10 a.m. to 5 p.m. (except Thursday from 1 to 5 p.m.), and on Tuesday, Thursday, and Saturday evenings from 7.30 to 8.30.

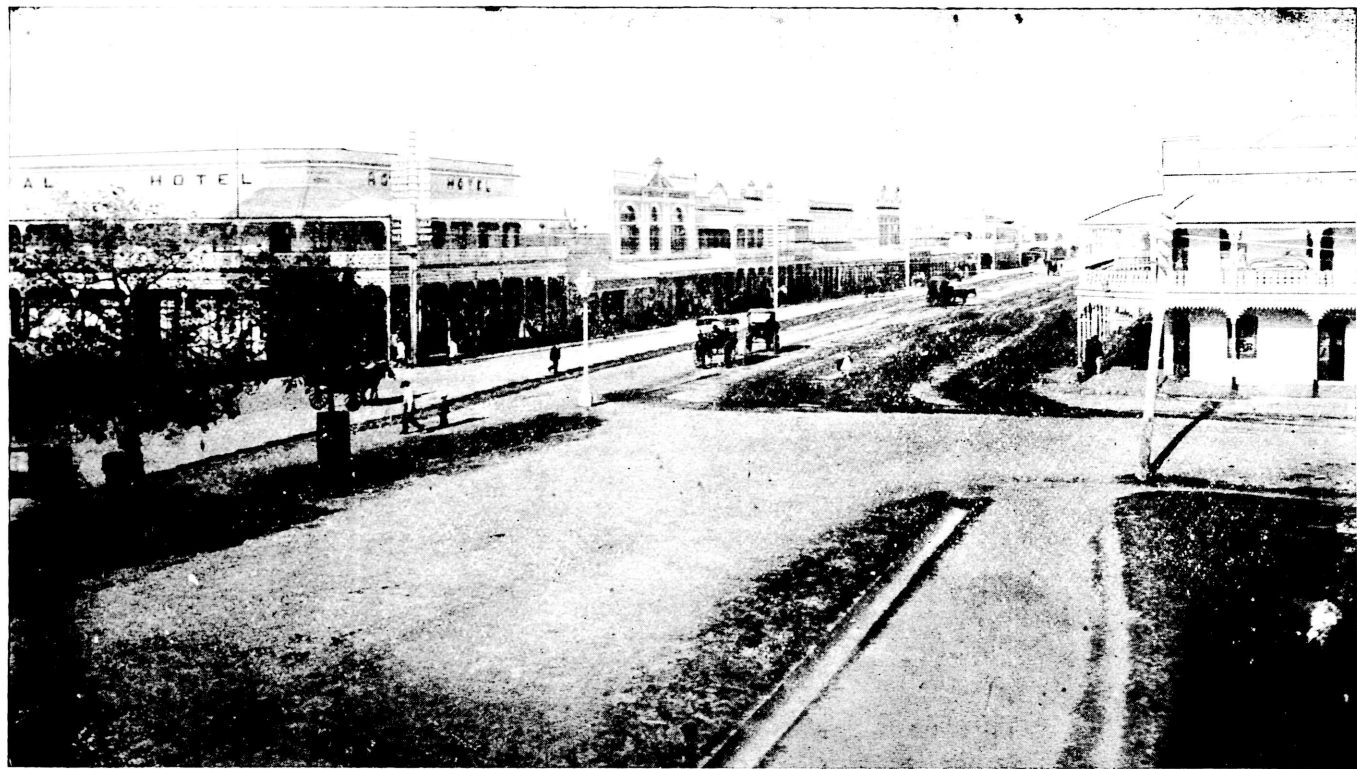

GOVERNMENT MEDICAL OFFICER—Dr. T. H. May.

SOUTH BUNDABERG, FROM CLOCK TOWER.

NORTH BUNDABERG, SHOWING RAILWAY AND TRAFFIC BRIDGES.

BOURBON STREET, LOOKING EAST.

**Town Council.**

Mayor, Peter Nielson ; Aldermen, J. F. Boreham, W. Dunn, R. Ruddell, W. F. Marshall, A. E. Avenell, A. Stevenson, L. H. Maynard, and J. Redmond. Clerk, E. Brady. Rate Collector, J. T. M'Carthy. Inspector of Nuisances, J. Hampson. Auditor, A. C. Wiles. Waterworks Engineer, C. Warrell. The Council meets every alternate Wednesday at 7.30 p.m.

**Barolin Shire Council.**

Chairman, Tom Penny ; A. C. Walker, F. W. Avenell, Jos. Nixon, G. A. Buss, H. S. Skyring, J. St. Ledger, G. L. Klein, and A. N. Dahl. Clerk, Valuator, and Foreman of Works, W. G. Moore. Meetings are held on the first Saturday in each month at 2.30 p.m.

**Gooburrum Shire Council.**

Chairman, W. J. Tutin ; A. M. Broom, D. Hull, T. Workman, F. Whittington, A. C. Haig, R. S. Aiken, and Jas. Clark. Clerk, S. F. Luke. Foreman of Works, D. Royan. Meetings are held first Friday in each month at 2.30 p.m.

**Woongarra Shire Council.**

Chairman, H. A. Cattermull ; M. R. Farquhar, Jas. Clark, P. L. Elliot, R. O. Strathdee, F. L. Nott, J. Fleming, W. J. Clement, and J. H. Thomas. Clerk and Inspector, Walter Pickering. Ganger, G. Baxter. Meetings are held first Tuesday in each month at 3 p.m.

**Chamber of Commerce.**

President, F. W. Payne ; Vice-President, W. B. Alford. Secretary, S. F. Luke. Auditor, G. Moran. Meetings are held monthly in the Council Chambers.

**Kennedy Bridge Board.**

President, L. H. Maynard ; W. Dunn, A. Stevenson (Town Council) ; Wm. J. Clement, John Fleming, and J. H. Thomas (Woongarra Council). Clerk, W. Pickering. Meetings are held when business warrants.

**Weights and Measures Board.**

L. H. Maynard and W. F. Marshall (Town Council) ; W. Gibson and W. J. Tutin (Gooburrum Shire Council) ; T. Penny and F. W. Avenell (Barolin Shire Council) ; J. Fleming and W. J. Clement (Woongarra Shire Council). Clerk, E. Brady. Inspector, W. McGown. Meetings are held first Friday in each month at 2.30 p.m.

**Burnett Bridge Board.**

President, A. E. Avenell ; T. Workman, Jas. Clark, L. H. Maynard, A. Stevenson, F. Whittington, Clerk, E. Brady. Meetings are held on the first Friday in each month, in the Council Chambers, at 7.30 p.m.

**General Cemetery Board.**

Chairman, Geo. Kendall ; H. Morris, W. F. Marshall, J. E. Lees, J. C. Walker, and J. Drinan. Secretary, W. G. Lewis.

**Fire Brigade Board.**

Chairman, P. Nielson ; W. F. Marshall, F. A. Castle, H. Morris, F. P. Brady, H. S. Skyring. Secretary, W. G. Lewis. Superintendent, Robt. Cunningham. Assistant, J. Hampson. Meetings are held on the second Thursday in January, April, July, and October, at 8 p.m., in School of Arts Chambers.

**Bundaberg Hospital.**

President, John Fleming ; Vice-President, J. H. Thomas ; Treasurer, J. E. Turner ; M. Dunn, J. F. Boreham, W. Blaikie, J. A. Sinclair, Tom Penny, W. Horsfall, A. E. Avenell, H. G. Hurst, H. Hall, P. Nielson, and S. F. Luke ; Government representative, H. Morris. Auditors, J. Cochrane and R. Thompson. Secretary, James C. Walker (office, School of Arts) ; Medical Officer, T. H. May ; Matron, Miss Scott ; Senior Nurse, Miss Powell, two staff nurses and three probationers ; Porter, W. Spence. Committee meetings are held on the third Tuesday in each month, in the Secretary's office, School of Arts Chambers, at 8 p.m. Visiting Days—Sundays, Tuesdays, and Thursdays, from 3 to 5 p.m., and at no other time without a written order from the doctor or a committeeman. No visitor must enter the institution without first applying to the Matron.

**Lady Chelmsford Hospital.**

President, Mrs. Marsh; Vice-Presidents, Mesdames Blaikie and Steindl; Treasurer, F. W. Payne; Secretary, Mrs. F. W. Payne; Committee, Mesdames Borcham, Fleming, Nielson, Hickson, Schmidt, Thorburn, and Toon.

**Railway Offices.**

Stationmaster, E. Maslen; Assistant, G. Roach; Foreman, J. A. M. Schmidt; Station Master's Clerk, F. Coleman; Ticket Clerk, B. F. Madsen; Goods Clerk, P. Lyden; Refreshment Rooms, Mrs. Balls.

NORTH BUNDABERG.—Stationmaster, R. Tunny.

**Agricultural, Pastoral, and Industrial Society.**

Patron, Hon. Angus Gibson, M.L.C.; President, H. N. Thorburn; Vice-Presidents' H. E. Ashley and W. B. Alford; Treasurer, W. F. Marshall; Committee, Geo. Buss, R. G. Curtis, A. H. Chippindall, M. Dunn, H. Hassall, H. Mullett, M. J. Reddan, J. Redmond, P. E. Turner, Dr. Luther, A. N. Dahl, H. S. Skyring, O. R. Steindl, T. Keys, and L. H. Maynard. Auditors, F. A. Castle and J. H. Thomas. Secretary, S. F. Luke. Committee meetings are held monthly in the Secretary's office, Targo-street.

**Banking Institutions.**

Bank of New South Wales, Quay-street.—Manager, F. Longwill; Accountant, R. C. Tipping.

Commercial Banking Company of Sydney, Bourbon-street.—Manager, J. S. Jessop; Accountant, W. H. Symington.

Queensland National Bank, Targo-street.—Manager, F. V. Murphy; Accountant, F. C. Mills.

Royal Bank of Queensland, Bourbon-street.—Manager, W. B. Alford; Accountant, J. Meiklejohn.

Union Bank, Bourbon-street.—Manager, Geo. Moran; Accountant, C. Mikkelsen.

**State Schools.**

CENTRAL BOYS.—Head Master, R. Monteith; Assistants, J. Smith, E. J. Kelleher, A. J. Beck, and C. H. Ferguson; pupil teachers, J. K. Murray, A. B. Steffensen. Average daily attendance, 178.

CENTRAL GIRLS AND INFANTS.—Head Teacher, Miss M. Deacon; assistants, Margaret A. Wright, Violet Nightingale, Margaret M. Meiklejohn, Ethel F. S. Faulkner; pupil teachers, B. M. Pegg, Florence A. J. Steffensen, V. Meiklejohn, and Carrie Chattin Cairns. Average daily attendance, 263.

SOUTH BUNDABERG.—Head Teacher, James Johnston; assistants, F. H. Springer, H. Mead, J. F. Wolter, Miss M. A. Walpole, Elenora Haig, Nellie Storey, Winifred Vasey; pupil teachers, A. Schmidt, C. Dawson, W. New, B. Cunningham, J. Walker, Percy S. Toft, M. M. E. Loxton. Average daily attendance, 423.

EAST BUNDABERG.—Head Teacher, R. R. C. Lister; assistants, D. Shannon K. M. Jones, Matthew J. Clish, and Jeanie Eagleson; pupil teacher, Elizabeth Ferris. Average daily attendance, 176.

NORTH BUNDABERG.—Head Teacher, G. W. Stanley; assistants, Miss Fielding, C. Ruddle, and Miss Stumm. Average daily attendance, 172.

BURNETT HEADS.—Head Teacher, Alex. Walls; pupil teacher, Miss Walls. Average daily attendance, 56.

KALKIE.—Head Teacher, James Atthow; pupil teacher, Miss Walker. Average attendance, 41.

BAROLIN.—Head Teacher, R. Ingram, and one pupil teacher. Average attendance, 43.

SHARON.—Head Teacher, R. J. Raymond, and one pupil teacher. Average attendance, 33.

WOONGARRA.—Head Teacher, J. J. Davis, and one pupil teacher. Average attendance, 48.

SOUTH KOLAN.—Head Teacher, F. Holdaway, one assistant, and one pupil teacher. Average attendance, 101.

SANDHILLS.—Head Teacher, Ellen Griffith. Average attendance, 35.

**Sugar Cane Growers' Union of Australia.**

President, H. A. Cattermull (Bundaberg); Vice-Presidents, W. N. Gillies (Richmond); Treasurer, J. Laurison (Gin Gin). Secretary and Organiser, Thomas W. Walker.

**Bundaberg Co-operative Dairy Company.**

Directors: John Greathead (chairman), T. Hall, A. N. Dahl, James Smith, James Drinan, and H. Mooney. Manager and Secretary, H. D. Wynter. Auditor, W. McGown. Directors' meetings are held monthly.

**Bundaberg Co-operative Insurance Association, Ltd.**

# THE ISIS SCRUB.

THE TOWN of Childers is situated in the heart of the highly-fertile district known as the Isis Scrub, and is distant by rail from Bundaberg 36 miles. It is the commercial centre of the district, and has increased considerably in importance during the past few years. The town can boast of many fine stores, a number of well-managed hotels, most of them being two-storied structures, a Post and Telegraph Office, Court-house, State School, Hospital, four Churches (Church of England, Roman Catholic, Presbyterian and Methodist), Shire Council Hall, three banks (North Queensland, Queensland National, and Commercial), a theatre, newspaper (*Isis Recorder*), sawmill, two cordial factories, coach works, and other industries which go to form a progressive community. The trade of the town is considerable, and is steadily increasing, dairying being a comparatively new industry, but of growing importance. Childers is connected with the main northern trunk railway by a branch line which runs as far as Cordalba, eight miles beyond Childers, and is twice daily in communication with the outside world, and in the crushing season many special trains are run. The construction of the extension of the railway from Cordalba to Dallarnil, a distance of 31 miles, is now in progress, the first sod having been turned on 29th October last by the Hon. W. T. Paget, Minister for Railways. It is expected that the line will not be completed under three years, although the first section to Booyal will probably be opened for traffic within fifteen months from the date of commencement. In view of the advent of the iron horse extensive areas of land are being put under sugar cane, both at Booyal and Dallarnil, and the railway should have the effect of opening to settlement much new agricultural and grazing country, as well as giving a welcome stimulus to the timber industry. The Crown lands contiguous to the railway have recently been permanently surveyed preparatory to being made available for selection. The Minister for Railways has expressed himself as favorable to the further continuance of this railway to connect with the Gayndah line, which will have the effect of giving to settlers along the route three markets for the disposal of their produce—Childers, Bundaberg, and Maryborough. Local affairs are governed by the Isis Shire Council, which comprises an area of 679 square miles, with a population of 6,000; the number of dwellings, 587; ratepayers, 1,039; revenue, £2,873; expenditure, £2,157; liabilities, £1,417; assets, £3,143; capital value of rateable property, £267,556. The district is represented in the State Parliament by Lieut.-Colonel C. D. W. Rankin.

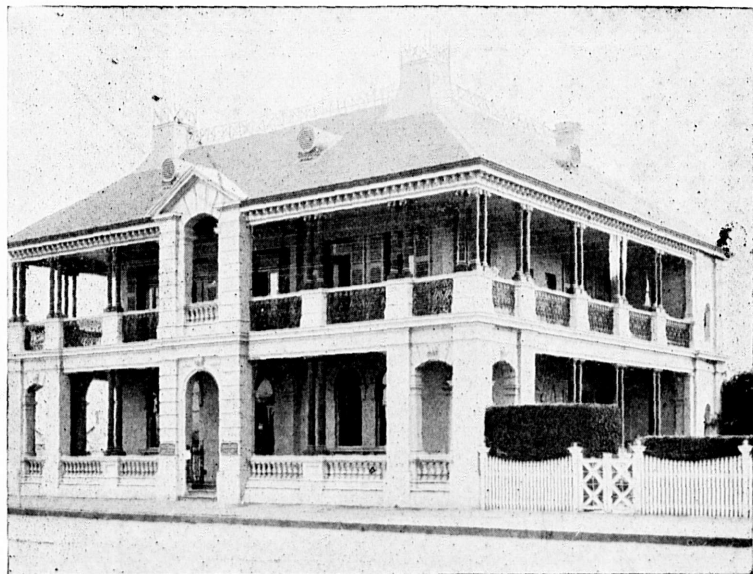

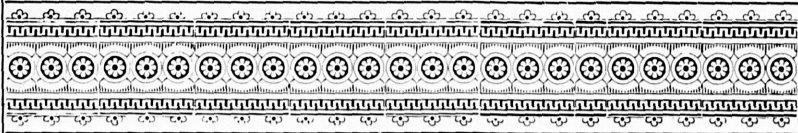

The district contains some 30,000 acres of fertile soil, composed mainly of red volcanic, undulating, agricultural land, and the balance of brown earth, grass-covered, suitable for dairying purposes. Although fifteen years junior to Bundaberg, in a settlement sense, the Isis has been transformed from a vine-clad jungle to a permanent and closely-settled district with commendable rapidity. Its career as a timbergetting locality to its present condition of prosperous agricultural and dairying importance forms a pleasing lesson in the ideal of the advantages of close settlement on the land by practical and energetic farmers. The Isis is notably a congeries of compact holdings, ranging from 40 to 160 acres, contiguous and fully utilised. At Doolbi, which is distant about a mile

MAIN STREET, CHILDERS.

QUEENSLAND NATIONAL BANK,

COMMERCIAL BANK,

from Childers, there is a complete and modernised mill, attached to the Millaquin and Yengarie Sugar Company's refinery at Bundaberg. This forms practically the commencement of the Isis sugar-growing and manufacturing sphere of activity. At Huxley, distant three miles beyond Childers, the Colonial Sugar Refining Company have established an extensive and powerful plant at a cost of some £250,000, and its network of tramways and loading apparatuses conveys and deals with the cane grown by the many farmers around the works. At Hapsburg, three miles further on, Messrs. A. H. and E. Young have a large plantation area, the largest block there; the product of this vast estate being trained to Fairymead for treatment. Cordalba, which is the present terminus of the Isis branch line, and distant eight miles from Childers, is on the edge of the red soil area. A tramline, two miles and sixty-three chains in length, connects the main line with the North Isis Central Mill, a concern which by its completeness and capable management has secured for itself the premier position amongst the central mills of the State. The total advance made by the Government was £39,000, and the total indebtedness of the mill up to the 31st Dec., 1909, was £21,609. The Isis, from its compactness and the class of landowners, is eminently suited for cane culture, and should therefore be largely bounty-earning. The Knockroe Mill passed into the Colonial Sugar Refining Company's possession some five years ago, and with it the cane-growing contracts attached thereto. Mixed farming is largely adopted by the homesteaders, and dairying finds an increasingly extended place in their favour. The cultivation of the *Agave Rigida* variety *Sisalana*—from which the sisal hemp of commerce is manufactured—is claiming attention in the Isis, and may in a few years become an important subsidiary industry to cane growing. The pioneer in this movement is Mr. T. H. Wells, of "Farnbro," who finds a ready market for the annual output of his hemp mill, situated on the estate. Twelve miles from Cordalba on the Burnett River there is the settlement of Booyal. This forms an irregularly-shaped plot of dark shotty soil and timber land of about 30,000 acres in extent. Farmers settled there grow successfully many varieties of products.

Sugar production for Childers, Maryborough, and Tiaro for 1909:—Area crushed for sugar, 11,268 acres; total area for sugar, 17,333 acres; weight of cane, 143,304 tons; sugar, 14,415 tons; molasses, 832,628 gals.; tons of cane per ton of sugar, 9.77; decrease in sugar over 1908, 5,154 tons; decrease in area, 816 acres.

Total area of land under cultivation for the year 1909 was 16,836 acres; maize, 1,369 acres; potatoes, 60 acres; cane, 12,878 acres; hay, 177 acres; green fodder, 41 acres; vines, 1 acre; bananas, 49 acres; pineapples, 2 acres; oranges, 17 acres; other crops, 45 acres. Production—maize, 34,185 bushels; potatoes, 60 tons; cane crushed, 110,916 tons; hay, 290 tons; oranges, 1,585 bushels; pineapples, 99 doz.; bananas, 829 bunches.

LIVE STOCK.—Horses, 3,063; cattle, 9,141; sheep, 114; pigs, 681.

# MOUNT PERRY.

THE town of Mount Perry, which is distant sixty-six miles by rail to the west of Bundaberg, is picturesquely situated, nestling in the valley between Mount Perry and the Normanby Range. The principal public buildings consist of Post and Telegraph Office, Shire Hall, Courthouse, Masonic Hall, Oddfellows' Hall, State School, Hospital, Wesleyan, Anglican, Presbyterian, and Roman Catholic Churches, Federal Hall, and a Workmen's Club for the mine employees. There are six hotels, several general stores, two butchers, two bakers, saddler, and many other business places which go to make a thriving community. Local affairs are controlled by the Perry Shire Council—the Shire comprising an area of 909 square miles, with a revenue of £1,413, the capital value of property being £70,753, the number of ratepayers 629, and the population estimated at 3,400. The State School has an annual enrolment of 400, with an average daily attendance of 340, and a teaching staff of ten. The Hospital is a well managed institution, and has ample accommodation.

The staple industry is copper mining, and the extensive and up-to-date works of the Queensland Copper Company are the hub of the community. The Company, since its advent to the district in 1901, has continued a career of increased activity, and the permanence and quality of the lode deposits operated upon still maintain their established character. The Mount Perry Mine still presents the principal property of the Company, on which the smelting works are erected. The year 1909, like 1908, was rather a critical one for copper, but it is satisfactory to know that operations have been steadily maintained, seeing that the price had gone down almost to bedrock. The Company is still adding to its already extensive plant, which amply proves their confidence in the future of the field. They have recently added a small concentrating plant, and three Wilfley tables are employed for the separation of mineral from gangue after the crushed and screened ore has been classified by water in the usual manner. A 37-B.H.P. Crossley gas engine, of the suction type, furnishes the power to drive a jaw-crusher, two sets of Cornish rolls, one elevator, trommell, and the tables. Two additional McMurty pots were added to the sintering plant to facilitate the work in hand, which increased owing to the advantage being obtained from desulphurising the blast furnace matter, so that a higher grade product could be produced. The Milne shaft, at the end of 1909, was 1,146 ft. in depth, while the eleventh crosscut and level was opened out at a depth of 1,130 ft. The Normanby main shaft section has been worked by tributers, with the usual results. A successful tribute party has opened out a third level from the Native copper shaft at a depth of 80 ft. below No. 2 level, and the prospects are good here for a moderate tonnage for some time to come. Palmer's shaft was partially shut down, awaiting concentration treatment for its ore, which is largely low grade. Regular but small supplies of ore have been received from New Moonta, Boolboonda, and Great Freehold.

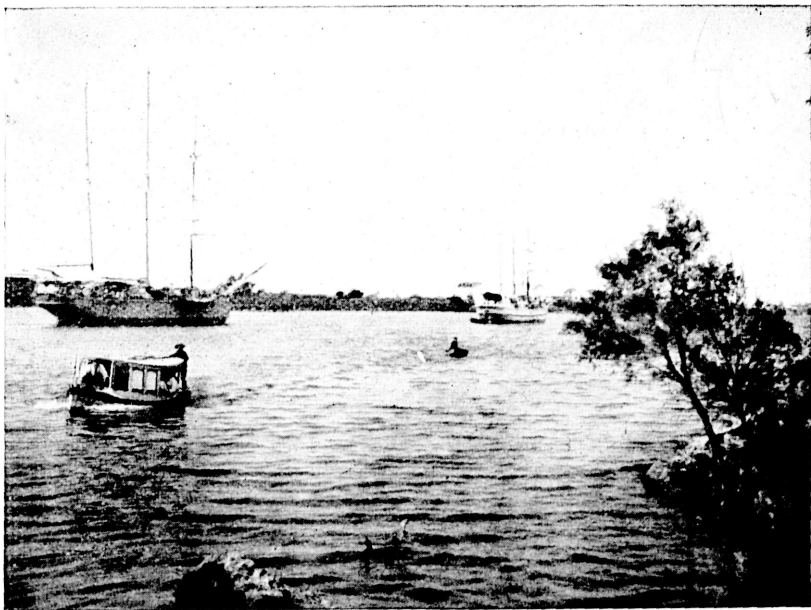

The total quantity of ore received and treated at the Queensland Copper Company's works during 1909 was 8,714 tons, which yielded 1,050 tons copper, 59,347ozs. silver, and 3,364ozs. gold.

TOWN OF MOUNT PERRY, FROM RAILWAY STATION.

BUNDABERG BOWLING GREEN.

BURNETT RIVER, TOWN REACH.

One water-jacket furnace is kept going, whilst a Merton roasting and reverberatory furnace has just been installed, which has reduced smelting costs considerably below the old treatment; and a wet process plant has been installed for the treatment of ores too silicious to be reduced by smelting. The ore is delivered to the smelting works by a gravitation tramway about 700 yards long. For the requirements of the smelting works and boilers, two reservoirs are provided for conserving the local supply of water, and the railway siding goes directly into the works above the ore yards. The Mount Perry Mine and surrounding places keep the smelters fully engaged, and consequently materially aid the interests of the town. Prospects are improving, and Mount Perry is sure to forge ahead if the value of metal increases, which is highly probable.

There are a good number of claims on the Boolboonda field, and all the ore raised in this district is at present sent for treatment to the Mount Perry smelters. The Boolboonda Copper Syndicate have driven four tunnels on their property during the past twelve months, all being prospecting work, and several small lodes have been located. Some twenty men are engaged.

The land under cultivation in the district for 1909 was 96 acres; production—maize, 962 bushels; potatoes, 40 tons; hay, 7 tons; oranges, 1,357 bushels.

LIVE STOCK.—Horses, 2,578; cattle, 23,203; sheep, 298; pigs, 184.

## GIN GIN.

GIN GIN is distant twenty-nine miles west from Bundaberg on the Mount Perry railway, and has a population of over 300. The township is pleasantly situated on an extensive black-soil plain, and surrounded by low broken ridges. It is well laid out—the main thoroughfare being three chains wide, and the intersecting streets one and a-half chains. A new post, telegraph, and money-order office has recently been completed, which is both commodious, convenient, and meets public requirements. The principal public buildings comprise—Railway Station, School of Arts, Oddfellows' Hall, Anglican, Roman Catholic, Methodist, and Presbyterian Churches, Shire Hall, and Court House. There are also four hotels, five general stores, coach and blacksmithing shops, two butchers; whilst the many private cottages with their flower garden attachments add variety to the landscape. Local affairs are controlled by the Kolan Shire Council. The Shire comprises an area of 1,109 square miles; population, 2,050; number of dwellings, 450; number of ratepayers, 579; capital value of rateable property, £204,065. The receipts of the Council for 1909 were £1,343; expenditure, £1,498; liabilities, £179; assets, £1,194. The State School, over which the popular Mr. O'Keeffe presides, is pleasantly situated in tree-planted grounds, and has an average daily attendance of about 90. Politically, Mr. W. B. O'Connell represented the Musgrave for 15 years, but on his death in 1903, Mr. J. White was returned, defeating Mr. C. F. Nielson. At the general elections in 1904 Mr. Nielson defeated Mr. White, but the last-named gentleman defeated Mr. Nielson at the general elections in 1907, Mr. Jas. Matthewson in 1908, and Mr. T. W. Walker in 1909.

Two miles distant on the eastern side of the township there is an extensive agricultural and dairying settlement; whilst the same distance westward is the Watawa Estate, held by a number of cane-growing leaseholders, under the name of New Laidley. The Gin Gin Central Mill is the leading industrial feature in the district. It is situated about eight miles from the town, and was erected under the Sugar Works Guarantee Act at a cost of £50,000, being capable of turning out 6,000 tons of sugar in a season. The tramway system covers  $32\frac{1}{2}$  miles of line; the main line is  $9\frac{1}{2}$  miles in length, and joins the State line near the town. The total moneys advanced from 1893 to June, 1910, was £53,338; amounts repaid—principal, £4,037 17s. 6d.; interest, £22,989 10s.; total amount interest and redemption due to June 30, 1910, £49,693 8s. 7d. The mill is in the hands of the Government, and the deeds held by the Treasurer were handed back to the owners in August, 1908. Operations for 1909—23,961 tons of cane supplied by European farmers; 19 tons by Asiatic grower. Prices paid to growers (exclusive of cartage) were 11/6 per ton for highland, 10/- for lowland, and 12/6 for stand-over; deductions for frost-damaged cane. Crushing commenced on 20th July and finished on 25th October. The extraction at the rollers was 91.31 per cent of the sugar in the cane; the raw sugars were despatched to the M. and Y. Co., Bundaberg. Only white labor was employed. The rainfall for the year was as follows:—July to December, 1909, 13.79 in.; January to June, 1910, 24.88 in.; total, 34.67 in., against 27.51 in. last year.

The total area of land under cultivation in the district for 1909 was 7,927 acres ; maize, 1,437 acres ; cane, 4,583 acres ; potatoes, 41 acres ; pumpkins, 7 acres ; hay and fodder, 190 acres ; other crops, 11 acres. Production—maize, 38,056 bushels ; cane crushed, 36,418 tons ; potatoes, 69 tons ; pumpkins, 13 tons ; hay, 430 tons ; grapes, 17,478 lbs. ; pineapples, 107 doz. ; oranges, 4,641 bushels.

LIVE STOCK.—Horses, 4,647 ; cattle, 50,324 ; sheep, 925 ; pigs, 718.

## MEMORANDA.

# Reader!

Is it not true that the power to reason for ourselves is one of the greatest gifts ever bestowed upon us ?

Nevertheless, at the same time a little friendly advice offered at the right moment is always appreciated.

Now, it is true, is it not, that your **Drapery, Boots and Shoes, &c.**, are some of your largest items of expense ? Now, this is where we offer our advice.

By dealing at **JOHN BLACK'S** you will save at least 10 per cent. on every article you purchase, which means a saving of 10 per cent. the whole year through.

**Don't Hesitate. Start Saving at once.**  
**It means Money for you.**

---

# FARM and GARDEN

## January.

### PLANTATION AND FIELD.

Cleansing and planting operations in the cane field will need careful and constant attention, and may be attended to as circumstances permit. Maize can be sown for green feed as well as for grain if done by the middle of the month; use early maturing kind if compelled to sow this month. Keep growing crops clean, but do not disturb the ground too deeply as the heat of the sun is very trying this month.

### KITCHEN GARDEN.

Summer vegetables, such as some varieties of beans, Chinese long and Fiji runners; also Chinese spinach, sweet corn, cucumbers, vegetable marrow, melon, and pumpkin, are in season. Only in cooler parts of the colony can other kinds of vegetables be grown, for during the hot weather it is waste of labor, time, and money to attempt to grow them in this part of the colony. Plant sweet potatoes, and prepare land for cabbage and cauliflower seeds to be sown in about five weeks' time. Herbs may be cut for drying.

### FLOWER GARDEN.

General attention to cleanliness and appearance is the most that can be done this month. Roses and ornamental trees and shrubs may be layered and roses budded. Seeds of calceolaria, zinnia, primula, cineraria, coleus, balsam, amaranthus, coxcomb, pansies, and other choice flowers may now be sown in boxes or seed pans, but should be protected from heavy rain by glass or calico. Gather seeds of desirable kinds of flowers as they ripen, and take up ripe bulbs of gladiolus. Plants such as dahlias or chrysanthemums of weakly and straggling growth, need keeping in trim with the knife, and securing to stakes. Stir the surface of beds and borders frequently, especially after rain, to prevent weeds getting a start. Pay close attention to lawns and walks, by mowing and weeding, also clipping the edges of grass bordering to walks, flower

beds, and borders. Preparations should be made for autumn sowing of annuals.

### FRUIT GARDEN.

Matters of ordinary cultivation are about all that can be done. Bananas and pineapples may be planted and other kinds of fruit trees prevented from wasting their energies in the production of useless wood by removing all the young shoots. Tropical fruits grown in pots may be planted out, and where mulch is available it is highly beneficial to cover the soil with a thin layer, as it prevents excessive evaporation and too great absorption of heat into the soil; and, if not too freely used, is promotive of health, vigour, and productiveness generally to the trees and crop. Straws grass (free from seed), leaves of all kinds, and straw manure form effective materials for mulching.

### BUSH HOUSE.

Coleus, begonias, caladiums, tydeas, gloxinias, and achimenes should now be gay with bloom. Ferns and orchids may be planted and fixed respectively, provided the weather is favorable. To successfully grow ferns, plenty of moisture and perfect drainage is required.

## February.

### PLANTATION AND FIELD.

With regard to the plantation the instructions given last month still hold good. In the field, continue to prepare land, ploughing it as deeply as possible. Lucerne may be sown in well prepared soil; drilling is recommended in place of sowing broadcast, so as to admit of hoeing. Vetches or tares, Cape barley, and sorghum should be sown for green food for stock. If sheltered, and in a warm position, 90-day maize may be sown, while early potatoes may be planted whole. Sulphate of lime, applied to the soil, greatly increases the health and productiveness of potatoes. Keep weeds down, and hill up maize.

**KITCHEN GARDEN.**

Activity should now be the rule in his department. Preparation should be made for a large planting of cabbage, savoy, cauliflowers, brocoli, Brussels sprouts, Kohl rabi, French beans, carrot, celery, mustard and cress, lettuce, peas, radish, prickly spinach, endive, onions, parsnip and turnip. Stir the soil between, and thin advancing crops. Now is the best time of the year for sowing sweet corn, but it is yet early for the bulk of the vegetables mentioned above.

**LOWER GARDEN.**

In order to catch the season for a good floral display with such plants as will not stand the heat, great activity should now prevail. Most English annuals can be grown now, and later on, that will not germinate at all during the summer months. No matter how excellent the seeds of mignonette, sweet pea, larkspur, and many other annuals indigenous to a cool climate may be, they positively refuse to germinate while the soil heat is high, and many people waste time, patience, and means trying to effect the impossible, and blame the seedsman for their own mistake. Take up ripe bulbs of gladiolus; stake and tie late flowering ones, also chrysanthemums, and other tall growing plants. Plant out zinnias, etc., grown in boxes or beds for that purpose. Keep the garden clean and neat, and withhold water from bulbous plants showing indications of going to rest. Abutilon, clerodendron, cobæa scandens, tecoma jasminoides, and many other plants should now be in full bloom.

**FRUIT GARDEN.**

Plantations of pines and bananas can now be formed. Plant out strawberries in ground previously prepared by being trenched and thoroughly manured, treading the surface very firmly before planting. Bonedust is an especially good manure for them. Remove all surplus runners from the plants, and peg down some of the strongest if required for extending area under crop. Oranges bearing heavily would be benefitted by a top dressing of some good special manure from cowsheds and urinals, or hen manure previously mixed or dissolved in water, diluted to a weak state and applied freely, or during a heavy fall of rain. Superphosphate of lime freely mixed with wood ashes and lime is an excellent dressing to apply to an orange in wet weather, when the trees are bearing heavily. Refuse, such as waste

vegetable matter and leaves, should be collected for leaf mould, to be used when planting fruit trees during the approaching winter.

**BUSH HOUSE.**

As the weather is generally seasonable during the present month, sunshine and shower intermitting, the majority of plants will be making luxuriant growth. Drainage will require attention, for though the fern tribe needs abundance of water, if allowed to stagnate, will do much injury.

**March.****PLANTATION AND FIELD.**

Great activity in planting will still continue both with sugar cane and tobacco. Sow lucerne, clover, rye grass, prairie grass, oats, barley, wheat, sorghum, and vetches or tares. Main crops of potatoes may also be sown. Hoe early potatoes, gather maize as it ripens, and cut tobacco leaves as they arrive at maturity. Sow mangolds, Swede turnips and Kohl rabi for winter food.

**KITCHEN GARDEN.**

Should previous instructions have been followed, the seed beds will be full of young plants, and sufficient land well dug and manured should be ready to receive them. Plant out cabbages, cauliflowers, Brussels sprouts, celery, etc., during favorable weather, *i.e.*, just before rain, choosing the largest and finest plants. By frequent and deep hoeing keep the beds free from weeds. Asparagus beds should receive a slight top dressing of salt, and fork in plenty of well decomposed manure. Transplant eschalots, and sow French and English beans, beet root, mustard and cress, carrot, celery, lettuce, endive, leek, peas, parsnip, radish, prickly spinach, turnip, couve tronchuda, savoy, etc. Well manured and deeply trenched beds should be made for asparagus or rhubarb, either of which will thrive better, and be more readily and thoroughly prolific if never transplanted.

**FLOWER GARDEN.**

This is a good time for sowing all kinds of hardy annuals, biennials, or perennials, such as dianthus, many sorts, stocks, phlox drummondii, asters, calliopsis, pansies, mignonette, Clarkias, antirrhinums, and many others. Enrich the soil with decomposed manure

or bone dust, sowing the seeds and transplanting the young plants in damp weather. Chrysanthemums are now showing signs of buds, and where quality is desired, all side shoots, and many of the buds, should be pinched out. Preparations should now be made for a good bed of cuttings by providing a patch of friable soil and some artificial soil for it, and through the winter it would render much service for striking cuttings of all choice plants, roses, shrubs, etc. Caladiums, gloxinias, and other bulbous should now be very sparingly watered; the pots can be placed on their sides as the plants and leaves die down. Honey-suckle, many of the rose family, feather palm, antigonon, Japan lily, and the yucca, Adam's needle, flower during this month.

#### FRUIT GARDEN.

Trees or vines which have been unproductive or sickly during the season should be attended to, so that they may be manured, scrubbed, syringed, pruned, or grubbed out as may be found necessary. Plant out strawberries, in new ground if possible, as they thrive much better and give better results. A spade should not be used in an orchard or orangery, as it is likely to damage the roots of fruit trees; a fork is the proper implement. Land intended to be planted with fruit trees during the approaching season, should be trenched and manured during the present month, if not already done. Stiff and retentive soils should be well drained, at least six inches deeper than they are trenched, regardless of the inclination of the surface. It should be remembered that the roots of the trees will be under the surface where the water will be retained unless drainage be provided. An emulsion of kerosene is most efficacious in ridding orange trees of the scale.

#### BUSH HOUSE.

The present month is a good time for forming one, and also for a re-arrangement of the plants, etc. See that the drainage of all plants is free. Watering should be done more carefully, and will be better done in the mornings after the middle of the month. No living shade should be allowed to grow over the bush-house, nor yet anything growing near them like passion vines or greedy feeding shrubs or trees, or the soil within will be impoverished. Prune fuchsias growing in the beds, remove decaying fronds of ferns, and keep all clean and tidy.

## April.

#### PLANTATION AND FIELD.

Cane planting or setting out tobacco may still be proceeded with if the weather be showery. Coffee planting may also be attended to at any time when the soil moisture shows it to be advisable. Sow vetches, lucerne, wheat, oats, barley, mangold, and Swede turnips. Gather sorghum and imphee as they ripen, or the birds will either consume or scatter the seeds. Plough land for future crops.

#### KITCHEN GARDEN.

Last month's directions still apply. This is the best time for planting potatoes, and growing some of the principal winter vegetables, such as cabbage, radishes, lettuce, carrots, peas, and kidney beans. Weeds must be kept down by continual hoeing. Divide and plant out herbs, giving water if requisite, until they are properly rooted. Plant out cabbages, cauliflowers, etc., in showery weather. Sow English beans, mustard and cress, lettuce, endive, onions, peas, leek, radish, etc., for succession.

#### FLOWER GARDEN.

Many annuals being now up strong enough, judicious thinning should be resorted to. Plants not wanted in any patch may be transplanted. Geraniums and petunias, and other hardy flowering and soft-wooded plants may be struck freely now, but put cuttings in where they are to remain. The petunia strikes freely enough thus, but sometimes does not again transplant well. To rose cuttings the same remarks apply, so that this should be borne in mind. Some roses strike freely—the Marechal Niel to wit—but succumb on being disturbed, so that the best course to follow is to place the cuttings in positions where they are likely to remain. Those wishing to grow good pansies or asters, will find a shading of boughs or calico very serviceable. Violets want all the shade they can get in order to flower profusely. Transplanting of flowering shrubs and roses may now be attended to. Chrysanthemums will shortly be flowering freely, and may be greatly helped by the application of weak liquid manure about twice a week. See that they are properly staked, and thin out to produce good blooms. This is a good time to lay down turf for new lawns, or to repair bare patches.

**FRUIT GARDEN.**

Push on preparation of the land for orchard and vineyard. Transplanting fruit trees, where practicable, should now be undertaken, and if done with care, with as much earth as possible round the roots, they will soon emit new shoots, and be established in their positions before the final fall of the leaf. This applies especially to evergreen fruit trees such as lemons, oranges, mangoes, loquats, olives, tamarinds, etc. The autumn rains will have indicated where drainage is necessary, which should be attended to without delay. Prop up bananas which have heavy bunches of fruit.

**BUSH HOUSE.**

Not much can be done in this department except effecting any alterations required, and keeping all tidy. Remove all brushwood shade where it is anyway dense, otherwise the plants will be soft and drawn, and be the sooner affected by the cold. Remove the more tender plants in pots to warmer quarters under glass. Look to the drainage of pots and keep it free.

**May.****PLANTATION AND FIELD.**

Preparations for the approaching crushing season are now in operation. Cane planting may still be done, as well as tobacco and maize. All new work in breaking up fresh land should be pushed forward vigorously while the winter lasts. Oats, vetches, rye, barley, and wheat may still be sown, also lucerne and various grasses. Potatoes will require earthing up. Rye as green fodder is much relished by cattle and horses, and if not allowed to seed, will make a sward for grazing over, being green and succulent during winter and early spring.

**KITCHEN GARDEN.**

Eschalots, rhubarb, onions, garlic, etc., may be transplanted. Sow lettuce, endive, leek, onions, peas, radish, mustard and cress, cabbage, turnip, carrot, parsley, and pot herbs. In preparing asparagus beds choose the best soil the garden affords, and the ground must be dug deep and plentifully manured. Rhubarb may also be planted in deep dug well manured beds. The onion crop sometimes suffers from the ravages

of a green grub, which are found in large numbers in some soils. Before planting, the land should be previously examined for this pest, and if possible a dressing of soot should be applied, which would also act as a valuable manure for the onions. Divide herb roots if not already done.

**FLOWER GARDEN.**

Clip hedges and edgings at once if not already done. Chrysanthemums will now require attention in removing dead flowers and keeping them neatly tied up. Mark the best with a view to propagating them, and the weedy ones to be removed. The seeds of hardy annuals may still be sown, although the results will not be equal to those sown months earlier. Continue planting roses and flowering shrubs, not forgetting pruning and the placing of cuttings in beds already mentioned, prepared for propagating purposes. Plant spring bulbs and tubers, mark the place sufficiently, and in the case of gladioli, with a stake suitable for the plants to be tied up to. The poinsettia pulcherrima should now be showing its brilliant bracts; the hibiscus is also in flower. Camellias are now in full bud or bursting into bloom, and in order to prevent the dropping of the buds they should be watered freely. Commence pruning roses, but do not prune the whole of the bushes at once, but a part, at intervals of three weeks, which will prolong the flowering, especially in the case of hybrid perpetuals.

**FRUIT GARDEN.**

This is a most suitable time for transplanting fruit trees and evergreen shrubs. Do not plant too deep, and put fine mould among the roots, firming it well with the foot, and using water copiously afterwards to settle the soil among the roots, unless the soil is wet. Strawberries may also be transplanted into soil enriched with leaf mould or well decayed cow dung, giving them abundance of water during their fruiting season. Protect tropical fruit trees in cold situations, and throw a little hay over the pineapple plants with the same object. Prune fruit trees as they lose leaves and the wood seems ripe and firm, painting the trunks with a dressing as a preventative against insect pests. A mixture of equal parts of soap, sulphur, soot and clay made into a thin paste with water has been recommended. Any trees affected with American blight should have attention; if only a spot or

two is affected, daub it with linseed oil, but if affected to a greater degree syringe with kerosene emulsion.

#### BUSH HOUSE.

If this retreat has been seasonably attended to, it will now be gay with many choice flowering plants such as fuchsias, begonias, pansies, and others, while cinerarias and primulas will be ready to do their best shortly. Remove all plants requiring glass protection to the frame, as frosts are often experienced by the middle of this month. Water sparingly and keep the whole place tidy.

## June.

#### PLANTATION AND FIELD.

The weather is likely to be too dry in most places for successful planting, and as the busy time for the cane grower is about commencing, planting may stand over in most cases. Arrowroot will fill out rapidly as the cold checks the growth on top. Sow oats, lucerne, rye, grass, vetches, prairie grass, etc., and prepare lands in warm situations for sowing with maize and planting with potatoes next month.

#### KITCHEN GARDEN.

Continue to plant out from seed beds all kinds of cabbage, cauliflower, broccoli, Brussels sprouts, etc., also Swede, lettuce, etc., as directed last month. Thin all advancing crops of carrots, parsnips, beet, turnips, etc., as required, and keep the soil stirred between them, especially after rain. Asparagus beds should be attended to if not already done. Cut down and clear away the old stalks, give a heavy dressing of thoroughly decayed stable manure, and fork it in, but do not dip enough to destroy the crowns that are now forming for next year's crop. Sow peas—early and late—for succession; also broad beans, both Windsor and long pod. Stick peas when three inches high; and keep the soil stirred between advancing crops of all kinds.

#### FLOWER GARDEN.

As this is a month during which all kinds of plants, whether deciduous or otherwise, may be safely shifted, it follows that it is about the best for altering and reforming beds, borders, or the general re-arrangement of the whole garden. Before commencing such, a plan of what is intended should be prepared and definitely decided upon. The

sowing of annuals becomes risky and doubtful now, except a few which are proving very hardy in Queensland. Finish the pruning and transplanting of roses and flowering shrubs, and water all newly planted shrubs or trees sufficiently to keep the soil moist, but not more. Too frequent water to plants not freely growing is often death rather than life to the roots. Violets should now be at their best, and in cool situations the English primrose may be got to flower. Dwarf nasturtiums should be flowering freely during this and the two following months. Poinsettia Dombeya and Erythrina are also in flower.

#### FRUIT GARDEN.

All kinds of deciduous fruit trees may be planted this month, being careful not to plant too deep. By careful observation the depth the tree has been growing can be seen, and it should in no case be planted deeper, and not quite so deep in newly trenched ground. Orange trees which are not in good health should have their trunks and large branches scrubbed with a scrubbing brush, and washed clean before the spring growth commences. The surface soil to the full circuit of the foliage of the tree should have a dressing of stable manure. Prune fruit trees and vines, and protect bunches of bananas in cold situations, by covering each with a light bag open at the bottom.

#### BUSH HOUSE.

There is little to be done in this department just now excepting removing decaying leaves and keeping all tidy, and effecting alterations if such are required. Fill up vacancies with ferns, lycopods, and orchids; also re-pot ferns. As the weather is now cold, the westerly side of the house should be protected by matting.

## July.

#### PLANTATION AND FIELD.

Sugar crushing will now be starting at most of the mills, consequently soil preparation and planting will be as much as possible deferred; still, where it is at all possible to get out-door work in the soil done, determined efforts should be made in such cases to compass it. Timely work is everything in profitable cultivation. The planting may be delayed a month or two, yet the

plant would mature earlier, and the juice acquire a better density if early planting were done. Cleanly and thorough cultivation yields good returns always in plantation, garden, or field.

#### KITCHEN GARDEN.

Seeds for sowing this month are very limited, but cabbages, carrots, radishes, parsnips, beet, peas, lettuce, mustard and cress, turnips, onions, leeks, and herbs may still be planted. Asparagus and rhubarb seed may also be sown in well prepared ground, the plants from seed in either case being much more vigorous and prompt in maturing if not transplanted. When sowing seeds after rain see that the land is in a friable condition; if too wet it will clog and bind together. Plant out onions and eschallots, and three or four days after rake the soil between the rows in dry weather, it will destroy innumerable weeds.

#### FLOWER GARDEN.

Hurry on any alteration to the beds, etc., so as to get them finished as soon as possible. Plant out from reserve beds as required. The sowing of English annuals should now be over, the varieties seasonable being such as portulacca, cockscombs, balsams, amaranthis, a few annual phloxes, and perhaps some Indian pinks. Amaryllis, gladiolus, alstroemeria may still be planted. Early sown annuals will now be in bloom, and those wishing to save good seed from them should ruthlessly uproot every indifferent flower, or the strain of seed must degenerate. Finish the planting, pruning, and propagating of roses and shrubs; hedge planting should also be finished. The Wigandia is now in flower, and many roses should be blooming freely. Other plants in flower are jonquil, narcissus, iris, and similar spring flowering bulbs. Old plants will be benefited by a dressing of decomposed manure, and if dry weather prevails they should have a soaking of water once a week, especially those flowering.

#### FRUIT GARDEN.

Pruning of deciduous trees should be finished this month. This is the best month for pruning grape vines, and cuttings of these should be made at the end of the month, as may be required for extending the vineyard. After pruning, the vine stems may be dressed with a wash of lime, soft soap, and sulphur. Plant out fruit trees and vines and such trees as are propagated in that manner. Graft young orange trees. The Seville

orange forms the best stock upon which to graft approved sorts. Mulch strawberry and raspberry beds with stable manure or other suitable material, and if a long spell of dry weather occurs, they should have a soaking of water, as this is the most critical time for strawberries. Eradicate docks and give a dressing of salt to the vines and fruit trees, lightly forking in well decayed manure where necessary.

## August.

#### PLANTATION AND FIELD.

Planting and general cultivation will still be deferred during the crushing season. The planting of sugar cane, rhea, and tobacco should not longer be deferred. Plant potatoes, maize, rice, yams, arrowroot, etc., and hoe up slightly potatoes that have reached that stage. Sow sorghum, imphee, teosinte, and tobacco. Earthnuts are a profitable crop in a light, friable soil, especially near the sea shore, and in soil having lime in it.

#### KITCHEN GARDEN.

Where the autumn sown crops of carrots, parsnips, and beet were too small to last, no time should be lost in making a sowing, otherwise it may be deferred for a time. Cabbage should be sown for succession. Sweinfurt is undoubtedly one of the best cabbages for summer growing. Continue to sow lettuce, radish, and endive for salading, also mustard and cress. A dressing of salt at this season, at the rate of 7 or 8 lbs. to the perch, would be of great advantage to most soils, tending to sweeten the land, retain moisture, destroy insects, and discourage weeds, fungus, and mildew. Destroy weeds when young; syringe with Gishurst compound, or with strong soap suds in which a little kerosene has been well mixed, plants which are attacked with aphids; an hour or so afterwards it is well to syringe the plants again with clean water. Thin crops and stick peas as they require it, and keep the soil stirred between all crops. Sow sweet corn and rosellas, the latter in a bed for transplanting.

#### FLOWER GARDEN.

In dry weather watering is now very advantageous, taking care that it reaches the roots. In order to do so, a piece of an old broom handle pointed and used to make a funnel-shaped opening into

the soil, will render efficient service, the hole at the top being covered over to prevent evaporation. Continue to plant gladioli—a succession of flowers of this indispensable bulb may be had for some seven or eight months in the year by judicious successional planting. Plant dahlias towards the end of the month, sow hardy annuals, and plant out any that have been kept in reserve for that purpose. See that recently planted roses and shrubs are moist at the roots. Never apply liquid manure to the roots of a plant not healthy or in vigorous growth. Protect plants and shrubs in the event of the weather being still severe. The *Bignonia venusta* with its orange racemes is now an attractive object, and were it not so common would be more highly prized. Several of the dendrobiums, orchids, ought now to be in full bloom. *Photinia anemones*, *freesia*, and other Cape bulbs, hyacinth, also asters, pansies, cosmos, and many early sown annuals are also flowering. Any shrubs, whether evergreen or deciduous, that it is intended yet to shift, should be moved as early as possible, and all alterations should be finished without further delay.

#### FRUIT GARDEN.

As the sun will now be gaining power, the planting and removing of deciduous trees should almost be finished. Young orange trees which show too much bloom should have it removed, and receive a little liquid manure to produce foliage. If orange trees are affected with the aphid, they should be syringed with water in which a small quantity of soft soap and sulphur have been dissolved. A small quantity of kerosene in a bucket of hot water has been found very effectual against scab, blight, etc. It should be well mixed and syringed on the trees, but kept from the roots. This should be done either before blossoming or after the fruit has set. Stake and tie young fruit trees, and any old trees having moss and lichen should be scraped with a blunt knife or similar instrument, and washed with a strong insecticide, one of the best for the purpose being sulphuret of lime, which is made by boiling together 5 lbs. lime (unslaked), 10 lbs. sulphur, and 10 gallons of water for thirty minutes, to be diluted with four times its bulk of water.

#### BUSH HOUSE.

As the worst of the frosts are now over, all frost-bitten and decaying por-

tions of the plants should be removed. In warm and sheltered places, specialties in coleus, caladiums, and crotons should be in place, and gloxinias, achiemenes, and lydias be planted. Fine bone dust is an excellent invigorator of fern borders, and if mixed with peat, wonderfully assists the finer sorts. Many of the plants growing in pots, such as foliage begonias, hardy ferns, hydrangeas, etc., will now be the better of re-potting.

## September.

#### PLANTATION AND FIELD.

As the warm weather approaches all tropical fruits or shrubs should be attended to. Those that have been recently planted should be shaded until the plant takes hold of the soil. Cane planting may be proceeded with, and keep the soil everywhere in as good a state of tilth and openness as possible to catch all the moisture available in dews and showers.

#### KITCHEN GARDEN.

This should be a month of activity, as the sowing of all summer crops may be proceeded with. Destroy all summer weeds as they make their appearance, and so keep the land thoroughly clean. Manure of all kinds should be collected and thrown into well puddled tanks to rot down for use in autumn and winter. During summer months manure should generally be applied in liquid form. See that crops are not planted too close as to be crowded. Trench vacant land in preparation for future crops, leaving surface rough to mellow by exposure. French beans, dwarf and runners, also marrows, squash, cucumbers, melons, tomatoes, and chillies may be sown; also round spinach. The planting of English potatoes should now be finished, while sweet potatoes may be planted as soon as vines can be got. Sow okra, sweet corn, Cape gooseberry, pumpkin, vegetable marrow, carrot, parsnip. Cut asparagus as it becomes fit, that is before the top begins to open, and when not more than 6 in. high.

#### FLOWER GARDEN.

The annuals sown in autumn will now be flowering freely, and if judgment has been displayed in selection and arrangement, a gay and attractive appearance will be the result. Watch the green fly on rose bushes and elsewhere, and apply soft soap and water with a syringe to destroy them; be careful the mixture is not too

strong. Syringing with clean water a little time after is recommended. Fill up borders with tender plants for summer ornamentation and display. Dahlia bulbs may now be planted, taking care that the colors are properly grouped for effective show. Chrysanthemums should now be divided and planted out. Azaleas should now be looking their best, also pansies. *Magnolia fuscata*, known as port wine plant, is in bloom; and among climbers the wisteria is a striking feature. *Gladiolus*, *amaryllis*, and lillies, also many roses and camellias are now blooming. Pay strict attention to mowing of lawns, chipping of edgings, and weeding.

#### FRUIT GARDEN.

The planting of orange and all other trees should now be finished, and digging of vineyards and orchards accomplished. In dry weather give recently planted trees sufficient water at the roots at intervals, leaving the surface to be kept damp by a mulching of stable litter. Attend promptly to disbudding of grape vines, removing suckers and superfluous shoots as soon as they appear. Tie up fruiting shoots to the trellises as they advance in growth. Proceed with grafting as the stocks attain the condition necessary for the operation. Pruning of orange trees may be commenced at end of month.

#### BUSH HOUSE.

Remove all decaying stems and fronds of ferns, as they furnish a lurking place for mealy bug, thrip, and scab, which are a scourge of many of the fern family. As the heat increases take care the roof shading is sufficient. Re-pot large ferns, and where necessary replenish the soil with new soil composed of leaf mould or scrub soil with a large proportion of sand.

## October.

#### PLANTATION AND FIELD.

Attend to the planting of sugar cane, arrowroot, coffee, and tobacco as showery weather permits. The cultivation should be liberal if good results are expected. Clean and earth up all growing crops. Plant yams, earth-nuts, ginger, and sweet potatoes. Sow sorghum, imphee, maize, setaria germanica, and teosinte.

#### KITCHEN GARDEN.

Crops must be kept clean; mulch them and give water where necessary—not surface sprinkling, for that does more harm than good. Sow French beans

both runners and dwarf, squash, marrows, cucumbers, pumpkins, melons both rock and water, egg-plant, capsicums, tomatoes, and chillies, as may be required; also Lima beans, which is a delicious vegetable, and should be more largely grown than it is at present. Convert all waste vegetables into manure in some form—either to feed pigs, or throw them into the manure tank or cask to rot. If dry weather prevails, crops of all kinds will be greatly benefitted by being mulched with short litter, leaves, or any similar material. Sweet potatoes may be safely planted everywhere now. Stick beans and hill potatoes as they require it.

#### FLOWER GARDEN.

Continue sowing half-hardy and tender annuals to take the place of bulbs that have now done flowering. These may be taken up and put into a box with soil to ripen. Only such planting as is seasonable, which consists of transplanting tropical annuals or biennials, or in propagating the same from cuttings, should be attempted. Always keep a supply of good compost ready to put about the roots of choice plants when putting them out into the borders, or for sowing choice seeds in. Plant out variegated plants propagated under the glass for ribbon borders or carpet bedding. There is not so much of this done as there might be where glass is available for propagating the quantity of each required, but no doubt a precarious water supply has much to do with the scarcity of this class of bedding. English annuals of all kinds should now be making the garden gay. Phlox, pansies, verberna, stocks, sweet William, carnation, candy tuft, mignonette, mimulus, poppies, petunia, lobelia, and many others; also the flaming lily, (*amaryllis*), others of the lily family, and fuchsias. The jacaranda is now a flame of ethereal beauty, and among climbing plants the Chinese jessamine is prominent both from its scent and appearance. Roses should now be making a grand display. Mulch with decomposed stable manure and look out for aphids, which are generally troublesome at this time, and syringe the affected parts with some good insecticide. Hot water is a good thing for these, and it is surprising how hot water can be used without injury to the plants—test it and prove it. Take up bulbs as soon as the leaves are withered, and store them in a dry place where no vermin can reach them.

**FRUIT GARDEN.**

Proceed with the pruning of orange trees. Loquat trees may also be pruned as soon as the fruit is off. Thin out the fruit on China peaches of all kinds, and carefully eradicate the suckers which spring from the root. Look over all fruit trees and disbud where necessary. This will save a lot of winter pruning as well as prevent waste of energy on the part of the tree in growing wood that is not required. Tie up vines as they grow, being careful not to injure the foliage, and see that the fruit is sufficiently protected from the direct rays of the sun. Sulphur the vines on the first appearance of oidium; do this in the early morning while the dew is on the vines. Plant bananas and pineapples. Look over grafted trees, loosen the ties, and remove any shoots starting in the stock below the graft. Remove strawberry runners to prolong the fruiting, and keep the plants mulched.

**BUSH HOUSE.**

Watering and syringing will form the principal work here. Any plants not repotted should be attended to at once, and as fuchsias and many other plants can now be brought in from the green-house or frame, there should be nothing wanting to make this luxurious and ornamental retreat one of the chief attractions of the garden. Give flowering fuchsias weak liquid manure occasionally.

## November.

**PLANTATION AND FIELD.**

Cane planting will now be proceeding slowly where it is found necessary to plough out old plants. The land should be kept clean with a horse hoe or scarifier. In making oat hay, cut the crops when well in ear, but before the seed is near mature; the whole plant is then in the best condition. Millet and teosinte may be sown freely now for fodder purposes.

**KITCHEN GARDEN.**

This month is often very dry, and unless the weather is more than usually favorable, little can be done in the way of sowing, unless water is available. Some of the most profitable vegetables to grow during summer months are the Chinese long runner beans, the Fiji bean, and the Chinese spinach. Madagascar beans also grow well during the summer months.

Thin cucumber and melon beds where over-crowded, and loosen the soil if it is bound. Sow French beans, melon, cucumber, lettuce, okra, rosella, pumpkin, and sweet corn. Sweet potatoes may be grown anywhere this month. Water copiously when necessary, and stir the soil between the crops often. A loose soil is nearly as good as a mulch.

**FLOWER GARDEN.**

Roses should be looked over frequently and dead flowers removed; long straggling shoots of noisette and tea-scented roses should be shortened. Angelonia, coleus, and summer growing herbaceous plants may be divided at the roots, or struck from cuttings, either in the open borders with occasional waterings, or in shaded beds made for the purpose. Continue to sow and plant out tender annuals. Keep carnations, etc., neatly tied up while flowering, and any that have done flowering may be layered. Among flower trees and shrubs now blooming are the magnolia, erythrina vespertina, cork tree, gardenia, stephanotis, hoya, and lasiandra.

**FRUIT GARDEN.**

Thin early peaches as soon as the fruit is fit for cooking. Mulch the trees a considerable distance round the stem. Plant all kinds of tropical fruit trees from pots, such as mangoes or jack fruit. Grape vines will require constant attention in removing superfluous shoots, tying, and stopping the shoots. The vines should be carefully watched for oidium, or other disease, and if there are any signs of appearance, sulphur must be freely used. Thin over-abundant crops of stone fruit, and, in fact, all fruits, remembering that six cases of prime fruit is more valuable than ten of small, inferior fruit. Hence it pays to thin in more ways than one. Look over orange trees frequently, and remove suckers from off the old wood. Syringe with kerosene emulsion if affected with the scale pest. See that young trees are secured to their stakes.

**BUSH HOUSE.**

Ferns will now be making vigorous growth and will require frequent watering. If mildew makes its appearance, sulphur should be dusted on the leaves. Supply hydrangeas well with water, and see that no others suffer. Continue to give fuchsias liquid manure. Water and syringe freely. Attention should be given to the shading, as the sun's rays are now very piercing.

## December.

### PLANTATION AND FIELD.

Crushing at most of the mills will now be ended, and cane planting and general cultivation will be proceeding apace. Dig potatoes as soon as they are ripe, as they will not keep in the soil; and have them collected as they are dug, or the sun will cause them to rot. Harvest wheat, oats, and barley; if left too late the grain wastes in gathering. Finish hay-making, taking care that the hay is not over-dried, or its feed properties are half destroyed. Sow maize, setaria germanica, millet, and sorghum.

### KITCHEN GARDEN.

Last month's remarks are also applicable this, and the sowing of seeds mentioned then may also be continued. In addition to cabbage and cauliflower, savoys, broccoli, and Brussels sprouts may be sown. Seeds sown during the summer months would be better if protected from the direct rays of the sun by some light covering. If the seed beds were well watered, so as to thoroughly saturate the soil, a few hours before sowing the seed, and the seed were covered by sifting over it some stable litter, there would not be so many failures. If dry weather prevails, a plentiful supply of water must be given to all growing crops at least once a week, and for cucumbers and salading three times a week will not be too often. A good watering twice a week is better than sprinkling every day.

### FLOWER GARDEN.

Continue to sow tender annuals, such as cockscombs, amaranthus, portulaccas, etc., and thin out previous sowings. Take up at once autumn and winter planted bulbs that have withered, dry them properly, and stow them for next year, unless previously done. Tie up gladiolus and dahlias. Cuttings of these

latter may be struck now if it is desired to propagate any particular sort by that means. Proceed with budding of roses. Clip edgings and hedges, and mow lawns frequently. Hoe and weed before weeds get too large. The poinciana regia, bauhinia hookeri or native ebony, hydrangia, and frangipani are now in bloom, also fuchsias, gloxinias, agapanthus, and lagerstrœmia.

### FRUIT GARDEN.

Thinning heavily laden trees and dis-budding, or finger-and-thumb pruning, is the principal work needed among fruit trees now. Young trees that have been budded, when the buds have taken, may be partially headed down, and if the bud shows a vigorous growth, the stock may be subsequently cut back to where it was budded. Many old trees that are not worth the ground they occupy, may be made to pay by being budded with sorts known to bear well in the district. On the slightest appearance of oidium among the vines, or American blight among fruit trees, dress them as previously directed. Those who object to the use of sulphur and lime in its dry state, may boil 1 lb. of sulphur with the same quantity of lime in a gallon of water for half-an-hour; one pint of this when strained may be mixed with ten gallons of water and applied to the affected vines with a syringe. Thin over-abundant crops of fruit, and rub off superfluous shoots as they appear.

### BUSH HOUSE.

Lighten up the beds among growing plants occasionally, as they are apt to become caked with frequent waterings. Water freely, and use the syringe often, and see that proper shade is not wanting. Some of the gloxinias, achimenes, and caladiums may be brought here now, and coleus should be largely represented, and present an attractive appearance.

### WIRE FENCING.—WEIGHT PER MILE FOR

## Control of Soil Moisture.

The following paper, on the above subject, was read by Mr. H. Rosss, Inspector of Agriculture, at a recent Conference on Dry Farming, held in Sydney:—

To many persons the success or failure of their crops is a matter of divine providence, and the crops themselves are not assisted to withstand periods of dry weather as well as might be possible. Successful agriculture must always necessarily depend largely on the natural rainfall (except, of course, where irrigation methods are possible), and it is the storage and control of this moisture with which this article is principally concerned.

Crops use, we know, an enormous amount of water during the period of growth, and water forms by far the greatest proportion of the materials which make up a plant itself. Various crops contain from 60 to 90 per cent. of nothing else but water; therefore it is not difficult to realise that water plays a very important part in the fertility of the soil, and in the feeding of a plant.

It has frequently been pointed out that artificial manure should never be placed on ill-prepared or badly cultivated soil, because the moisture supply of such soil is such as to render much of the manure useless, on account of its remaining undissolved. Plant-food that has been prepared in the soil or in the air is useless unless it is held in solution in soil moisture, and is thus carried through the agency of the roots to all portions of the plant.

### WATER HOLDING CAPACITY OF SOILS.

There are very few soils which ever continuously bear the maximum crops of which they are capable. The reason is not far to seek. They rarely receive the amount of water required just at the particular time it is most needed. Hence those soils which are capable of storing up reserves of moisture to be drawn upon during dry periods are those best fitted to produce maximum crops. There is a considerable difference in the amount of water soil can hold which depends on the size of the soil grains as well as on the depth of standing water in the ground below surface, and on the amount of humus present in the soil. In a general manner of speaking it may be said that soils composed of fine grains will hold more water than coarser soils.

### IMPROVING THE WATER-HOLDING CAPACITY OF A SOIL.

That soils composed of fine grains will hold water it is essential that the soil should first be brought into such a condition that the rainfall may be absorbed and stored. It is a fallacy to think that because there is a large annual rainfall crops grown in those regions must necessarily be beyond the reach of drought. We have too many instances to disregard this warning. Owing to imperfect tillage or possibly to too late fallowing much of the rainfall is lost by the water flowing off the surface of the land, and thus it never has the opportunity of benefiting crops.

On a well-tilled field fallowed in autumn, the water collects and remains stored up for future use. The capacity of soils to hold moisture, however, has a limit, and there can be no question that some soils are capable of holding more moisture than others. Those containing a high percentage of humus or vegetable matter are best fitted in this respect.

While it is not practicable under existing methods to plough stubble or refuse of crops under, some means will have to be adopted in future to restore some of the humus to the soil, in order to increase its water-holding capacity. One of the reasons why virgin soils generally bear good crops for the first two or three years of cultivation is that they contain appreciable amounts of humus. Artificial manures do not restore any humus to the soil, and for this reason the continuous use of artificial fertilisers is not calculated to produce permanent fertility. It might truly be said that artificial manures can only produce their maximum results when the moisture conditions of the soil are favorable, and they can only be favorable when there is a certain percentage of humus present.

### IMPROVEMENTS EFFECTED BY CULTIVATION.

There is yet another way by which the water-holding capacity of the soil may be increased, and that is by cultivation. Whatever may be the rainfall of the district, the only portion which is of value to growing crops is that which is retained by the soil. Again, in many districts the average rainfall is not suffi-

cient for the production of large crops; hence the treatment of those soils has to be specially considered, and the practice of fallowing has come to be almost universally adopted by successful farmers.

#### THE MAIN OBJECT OF FALLOWING LAND

is the conservation of moisture, so that two years' rainfall may be stored in the soil to produce one crop. Before the advantages of the bare fallow system were fully known it was customary to merely plough the land and leave in its rough state, without any extra cultivation, until it was required to be sown again; it is fully recognised, however, that the usefulness of a fallow depends entirely on its being kept loose on the surface, and the harrows may be required to pass over the field six or more times solely to preserve a loose surface mulch and keep the land free from weeds.

Now, why is it that the preservation of a loose surface mulch hinders the evaporation of moisture? It is a well-known fact that when soil becomes hard and compact, it rapidly dries out owing to the rise of moisture through the capillary tubes of the soil; when the particles of soil are in close, firm contact with each other the water mounts from below to the surface, and is quickly evaporated. When, however, the capillary tubes are broken, as is the case when the surface of the soil is loose, the water can only rise to the under surface of the loose mulch, and thus does not pass away by evaporation. The drier and looser this mulch is the more effective it is in checking evaporation, and it cannot be renewed too often. This should be especially the case after a

rainfall; then the surface of the soil runs together and forms a crust, which would speedily re-establish capillary attraction, and thus render useless all the previous attempts at conserving the moisture.

It cannot be too strongly urged that fallowing should be done as early as possible in the winter. A field late fallowed loses a great proportion of the beneficial winter rains, and the subsequent summer cultivation cannot improve the moisture content, but can only conserve what the soil already holds. Harrows, spring-tooth cultivators, or disc cultivators, may well be used with advantage in forming this loose surface mulch previously referred to, but care should be taken never to use a disc harrow with discs simply set straight; if such an implement is employed the soil is just cut through, as with a knife, and the rate of evaporation may be considerably increased. If, however, the discs are set at an angle, so that the surface to a depth of from 2½ in. to 3 in. is thoroughly turned, the rate of evaporation may be considerably checked.

From what has been said, it is not difficult to understand that the regulation of the moisture content of soils is largely in the hands of the cultivator. In dry districts most particular care should be given to the working of the fallow, and some system should be established, which makes it possible to restore to the soil organic matter to provide humus. If these precautions are taken, there is a scientific basis for the work done, and good results will follow; but it is merely waste of time and labour to imperfectly work fallowed land and expect it to retain moisture.

## LOADING PIGS.

Loading pigs is usually a disagreeable job. It is greatly simplified, however, where an elevated pen with a floor on a level with the waggon bed is available, but there are few farmers whose feed lots are thus arranged. The only way to load the porkers is with an improvised chute, which is always more or less of a nuisance. A substantial chute, with an inclined floor—the longer the floor the better, as the ascent will be less steep—is made of 4 in. fencing, spiked to a frame of 2 in. x 4 in. with posts of 4 in. x 4 in. stuff. To add to the solidity of the affair the 2 in. by 4 in. and 4 in. x 4 in. should be bolted together; floor of rough

timber. Nail cleats on floor to prevent the hogs from slipping. One end of the chute rests on the ground, while the other is on a level with the waggon-bed floors. This chute should be made of as light material as stability will allow, for it is often convenient to change its location. The rest of the arrangement is two sections of slat fencing, to be used as wings. One end of each section is fastened to a side of the chute, and unrolled. When set up the two wings will make a large V, of which the point is the chute. The hogs can be easily driven inside the V; then the two ends of the slatting can be brought together.

**AVAILABILITY OF TICKETS.**

Single tickets for distances of 50 miles and under are available on the day of issue only; for distances over 50 miles and under 150 miles, seven days after date of issue; 150 miles and over, fourteen days; but the journey must be commenced on the date of issue.

Return tickets are available as follows:—10 miles and under, day of issue only; 11 to 50 miles, 2 weeks; 51 to 150 miles, 1 month; 151 to 300 miles, 3 months; over 300 miles, 6 months. The forward journey must be commenced on the day of issue, and completed within period for which single ticket is available.

Passengers holding return tickets may be allowed to break their journey at any station, provided the journey is completed within period for which tickets are available.

Passengers holding excursion tickets to places distant 200 miles and over may break the forward journey, provided they travel not less than 100 miles on the day of issue. The forward journey must, however, be completed within the period for which a single ticket is available.

**SLEEPING BERTHS.**

The charges for sleeping car berths are—1st Class—Lower berth, 10s.; upper berth, 5s. 2nd Class—Upper and lower berths, 2s. 6d. No attendant or bedding supplied in 2nd class cars.

**WEEK-END EXCURSIONS.**

Tickets at excursion fares are issued every Friday and Saturday between all stations 12 miles and over apart, available to return until

the following Monday; where no Monday train the first running day thereafter.

**MONTHLY EXCURSION TICKETS.**

Tickets at Excursion Fares are issued between all stations not less than 100 miles apart on the first Saturday and preceding Friday in each month, available for return for the same period as ordinary return tickets.

**INTER-STATE FARES.**

**Bundaberg to Sydney**—1st Class—Single, £5 15s.; Return, £8 12s. 6d. 2nd Class—Single, £3 15s.; Return, £5 12s. 6d.

**Bundaberg to Melbourne**—1st Class—Single, £9 2s. 1d.; Return, £14. 2nd Class—Single, £5 13s. 6d.; Return, £9 15s.

Single tickets are available for one calendar month, including Sundays and the dates of issue and collection.

Return tickets are available for six months, including the dates of issue and collection.

The journey may be broken on the route, but the forward journey must be commenced on the date of issue, and completed within period for which single tickets are available.

When the journey is broken the Ticket should be lodged with the Stationmaster, and can be obtained from him when the passenger resumes his journey again.

Sleeping berths are provided for the night journey through New South Wales, at a charge of 12s. each.

# ENCYCLOPÆDIA OF INFORMATION.

## ASTRONOMY.

**The Moon** is 240,000 miles distant from the earth.

**The Sun** is 91,430,000 miles distant from the earth, and is 852,900 miles in diameter.

**The Earth** is 7,926 miles in diameter at the Equator, and 7,899 miles from Pole to Pole; the circumference 24,899 miles at the equator.

**The month of February, 1866**, was in one respect the most remarkable in the world's history. It had no full moon. January and March had each two full moons. It was a rare occurrence in nature, such a thing never having happened since the creation of the world, and according to astronomers, will not occur again for 2,500,000 years.

## BALLOONS.

**The first balloon ascent** took place at Annanay, France, by the brothers Montgolfier, on June 5, 1783.

**The highest elevation** ever attained by balloonists was 37,000 feet (about 7 miles). The ascent was made by Glaisher and Coxwell, at Wolverhampton, England, on Sept. 5, 1862.

## BAYS AND SEAS.

**The Atlantic Ocean** has an area of 35,160,000 square miles.

**The Pacific Ocean** has an area of 67,800,000 square miles.

**The entire coast line** of the globe is about 136,000 miles.

**The Suez Canal** is 92 miles long, and cost £30,550,000.

**The greatest known depth** of the ocean is 46,000 feet, or 8½ miles.

**The largest bay** in the world is that of Bengal. Its extent is about 420,000 square miles.

**The largest gulf** in the world is the Gulf of Mexico—800,000 square miles—nearly twice the extent of the Bay of Bengal.

**If the whole** of the land on the globe above water level was shovelled into the Pacific, it would only fill 1-7th of it.

**The Caspian Sea** is the lowest body of water on the globe. Its level is 85ft. below the level of the neighboring Black Sea.

**The highest tide** in the world is in the Bay of Fundy, between Nova Scotia and New Brunswick. The tide there sometimes rises 71ft., and the increase is occasionally as much as a foot every five minutes.

**The height of waves** in a gale in the open sea average about twenty feet, but in a severe gale the greatest waves measure about forty feet from crest to hollow. The height of the waves in feet is about one-half the velocity of the wind in statute miles per hour.

## BRIDGES.

**The highest suspension bridge** in Europe is near Geneva, and called the Pont de la Caille. It is 478 feet above the ground.

**The highest viaduct** in the world is Verrugas Viaduct, on the Lima and Oroya railway, Peru, being 12,000 feet above sea level.

**The longest suspension bridge** in the world is that between New York and Brooklyn, the entire length being 5,980 feet.

**The longest trestle bridge** in the world is over the Great Salt Lake, in Wales. It is over 20 miles long and bears a railway, thereby saving a circuit of 44 miles.

**The longest bridge** in Great Britain is the Forth Bridge; it is one and a half miles in length, and took seven years in construction, from January, 1883, to March, 1890, in which month it was opened. It cost £2,700,000.

**The biggest and heaviest bridge** in the world crosses the East River at Blackwell's Island, New York. It has a length of 7,408 ft., two floors accommodating eight railway and tramway tracks, a 36ft. roadway, and two 13ft. pavements for pedestrians.

## BUILDINGS, ETC.

**The highest tower** in the world is the Eiffel Tower in Paris, 984 feet.

**The largest Pyramid** in Egypt is 543 feet in height, and its base covers 11 acres.

**The Wall of China** is 1,250 miles long, and was completed about 220 years B.C.

**The highest spire** in the world is that of Cologne Cathedral, Germany, 511 feet.

**The largest police station** in the world is New Scotland Yard, London, having accommodation for over 3,000 officers.

**The largest dome** in the world is that of the Pantheon at Rome, having a diameter of 142 feet, being 30 feet larger than St. Paul's.

**The largest stockyards** in the world are those of Chicago, which contain 20 miles of streets, and 50 miles of feeding troughs, and are capable of holding 20,000 cattle, 20,000 sheep, and 10,000 pigs daily.

## CAVES, MINES, ETC.

**The largest caves** in the world are the Mammoth Caves in Kentucky, being over 100 miles in extent.

**The Catacombs** of Rome contain the remains of over 6,000,000 human beings; those of Paris, 3,000,000.

**The deepest mining shaft** in the world is in Cape Colony, which has been sunk to a depth of 5,300 feet, or a little over a mile.

**The five leading cities** in the United States, and their population in 1906, are as follows:—New York, 4,100,000; Chicago, 2,000,000; Philadelphia, 1,400,000; St. Louis, 619,000; Boston, 600,000.

## CITIES.

**The City of Calcutta** has a population of 1,106,738.

**Greater London** covers about 700 square miles and has a population of nearly 6,500,000.

**London** is 12 miles broad one way, and 17 the other, and about 20 miles of new streets are added to it every year.

## DAYS, WEEKS, MONTHS.

**The length of the day** at any time of the year may be found by doubling the time of the sun's setting.

**The length of the night** at any time of the year may be found by multiplying by two the time of the sun's rising.

**January and October** in the same year always begin with the same day of the week. The case is the same with April and July; with September and December; and with February, March, and November.

**Days of the week.**—Monday was sacred to the moon. Tuesday is the day of Tiw, the Northern Mars, or god of war. Wednesday

is the day of an Icelandic god "Woden." Thursday belongs to "Thor," god of thunder. Friday is the day sacred to Friggeo or Freya, the Teutonic goddess. Saturday is "Saturn's Day." Sunday was the day dedicated to the worship of the sun. "Sabbath," though often used to designate the first day of the week, in its strict sense, is not Sunday, being a Hebrew term for 'rest'; hence a Sabbath may extend for a week or a month.

**Months of the Year.**—January is from the Italian "Janus," god of the sun and year. February is from "februa," purification, because the great Roman feast of purification was held on the 15th. March is from the god of war. April, from "aperio," to enclose, is the month in which in Europe the earth opens for the growth of plants. May is from the goddess of growth, Maius. June is attributed to Juno. The Roman calendar began with March, and July used to be "Quintilius," or fifth month, but it received its present name in honor of Julius Caesar. August was formerly "extilis," but was changed in honor of the Roman Emperor Augustus. 'Septem,' 'octo,' 'novem,' 'decem'—seven, eight, nine, ten—stand as formerly, and give names to September, October, November, and December.

#### DISCOVERY.

**America** was discovered by Columbus in October, 1492.

**Botany Bay** was discovered by Captain Cook in 1770.

**Australia** was discovered by the Dutch in March, 1606.

#### MEASUREMENTS.

**The English acre** is 4,840 square yards; the Irish, 7,840 sq. yards; and the Cornish, 5,750.

**The largest county** in England is Yorkshire, which has nearly 4,000,000 acres. Lincoln stands second, and Devonshire third.

**London** and **Liverpool** are both at the level of the sea; **Glasgow** is 30 feet above it, **Manchester** 50 feet, and **Birmingham** 300 feet.

**The area of Europe** is 3,756,970 square miles; **Asia**, 17,212,680 square miles; **America**, 14,754,450 square miles; **Africa**, 11,514,770 sq. miles.

#### MISCELLANEOUS.

**The first public library** was founded about 540 B.C., at Athens.

**The atmospheric pressure** on a man of average stature is fifteen tons.

**The difference in time** between London and Queensland is 10 hours 13 minutes.

**The first Sunday School** was established at Gloucester, England, by Robert Raikes, in 1780.

**The first omnibus** in London started running on the 4th July, 1829, between Paddington and the Bank.

**The largest book** in the world is in the British Museum. It is an atlas, measuring 5ft. 10in. by 3ft. 2in., and weighing close upon 2cwts.

**The largest collection** of picture post cards in the world is owned by the Prince of Wales's eldest son. It includes every country in the world, and consists of 10,000 cards.

**The glaciers** in Greenland average 1,000 feet in thickness, move a distance of 50 feet per day, and discharge into the sea four square miles of ice 1,000 feet thick annually.

**The largest map** in the world is the Ordnance Survey Map of England, which covers 108,000 sheets. In its preparation it cost £200,000 a year for 20 years. The scale varies from 10ft. to 1-10th in. to the mile.

**The most gorgeous baths** in the world are established in New York. They cover 54,000 square feet, and have accommodation for 500 bathers at a time. Birds of brilliant plumage flit too and fro, singing their songs to the accompaniment of running waters of marble fountains.

**The Victoria Cross** was instituted in 1856. It is a Maltese cross of bronze, attached by the letter V to a bar, on which is a sprig of laurel. On the obverse is the British lion and crown in the centre, and beneath, on a scroll, the words "For Valor." The reverse is plain, with a circle in the centre, in which the date of the act of bravery is engraved. The name of ship or regiment of the recipient are engraved on the back of the bar. Ribbon, blue for the navy, red for the army.

**The greatest noise** on record was made by the eruption of Krakatoa, in the Straits of Sunda, in 1883. Here are a few striking facts about the eruption. It caused a cloud 17 miles high. It was heard 3,000 miles away. The velocity of the explosion was three times that of an Armstrong gun. It raised tidal waves 100 feet high, that invaded the land for five miles. It created dust finer than any rock can be ground by man. This dust was carried round the earth for three years in the air. It caused air waves that encircled the earth seven times. It broke windows 100 miles distant.

**First Things.**—The first sulphur match was made in 1829.—The first iron steamship was built in 1830.—The first steel pen was made in 1830.—Ships were first "copper-bottomed" in 1837.—The first anaesthetics were used in 1844.—The first steel plate was made in 1830.—Coaches were first used in England in 1569.—The Franciscans arrived in England in 1224.—The entire Hebrew Bible was printed in 1488.—The first daily newspaper appeared in 1702.—Christianity was introduced into Japan in 1549.—The first telescope was used in England in 1608.—Omnibuses were introduced in New York in 1830.—The first temperance society was organised in 1808. The first almanac was printed by Geo. von Furbash in 1660.—Morse successfully operated the first telegraph instrument in 1835, but did not demonstrate it to the world until 1842.

#### MOUNTAINS.

**The highest point** at which flowering plants have been found is in Thibet, at 19,200 feet.

**The highest mountain** in the world is Mount Everest, in the Himalayas, being over 29,000 feet above sea level.

**The highest inhabited spot** in Europe is the Observatory on Mount Etna, which is 9,075 feet above sea level.

**The loftiest active volcano** is Mount Popocatepetl, Mexico, 17,748 feet above sea level, and has a crater three miles in circumference and 1,000 feet deep.

**The most active volcano** in the world is Mount Sangay. It is situated in Ecuador, is 17,120ft. in height, and has been in constant activity since 1782. Sounds of its eruption have been heard 150 miles distant, and once 267 reports were counted in one hour.

#### PAPER AND NEWSPAPERS.

**In Great Britain** there are 2,431 newspapers published.

**The first Japanese newspaper** was published in 1863. To-day Japan has 1,500 daily newspapers and periodicals.

**America** in 1900 published no less than 2,226 daily newspapers.

**Newspapers** were first printed in England in 1622; in America in 1690.

**Paper** was invented in China about the commencement of the second century. It was made from the bark of trees, bamboo, rags, silk, hemp, or cotton reduced to pulp.

#### RAILWAYS.

**The steepest railway** in the world is up Mt. Vesuvius; one gradient rises 63 feet in 100.

**The highest railway** in the world is the Oroya, in the Andes. It reaches a height of 15,840 feet.

**The United States** has 203,000 miles of railways; the United Kingdom, 22,103 miles; Canada, 20,000.

**The first railway** in Australia was between Sydney and Parramatta, the first sod of which was turned at Sydney, on 3rd July, 1850.

**The longest railway tunnel** in the world is the Simplon Tunnel, passing under the Pennine Alps, on the Italo-Swiss frontier. It is a little over 12½ miles in length, was begun in 1898, and cost over £3,120,000.

**Russian railways** are said to be the most dangerous in the world. Thirty in every million passengers are either killed or hurt.

#### RIVERS AND LAKES.

**The longest river** in England is the Severn; in Scotland, the Tay; in Ireland, the Shannon.

**The highest lakes** in the world are in the Himalayas, in Thibet, where there are some bodies of water as high as 23,000 feet above the level of the sea.

**The longest rivers** in the world—Missouri-Mississippi, 4,194 miles; Nile, 4,020; Yangtze, 3,158; Amazon, 3,063; Amur, 2,920; Congo, 2,883; Mackenzie, North America, 2,808.

**The deepest lake** in the world is Lake Baikal, in Siberia. Nine thousand square miles in area, or nearly as large as Lake Erie, it is 4000ft. to 5000ft. deep, so that it contains nearly as much water as Lake Superior.

#### STATISTICS.

**Languages.**—The world's languages and dialects number no less than 2,750.

**Paris** has the biggest debt of any city in the world, amounting to £80,000,000.

**France** has the largest national debt in the world, the amount being £1,200,000,000.

**The Bible** contains 3,566,480 letters, 773,746 words, 31,102 verses, 1,189 chapters, 66 books.

**The British Empire** has an area of 11,600,000 square miles, with a population of 400,000,000.

**The Indian Empire** has an area of 1,766,567 square miles, and a population of 294,361,065, or 167 per square mile.

**The British national debt** is now stated to be over £768,000,000, the interest on which is no less than £18,500,000.

**The population** of London in 1350 was 90,000; in 1600, 180,000; in 1650, 350,000; in 1700, 550,000; in 1801, 864,000; in 1841, 1,872,000.

**The Bank of England**, regarded as the world's strongest financial institution, has, in round numbers, £14,200,000 of capital, £39,000,000 in specie, and £30,000,000 in circulation.

**Religions.**—The religions of the world are as follows:—Protestants, 110,000,000; Roman Catholics, 175,000,000; Buddhists, 400,000,000; Mohammedans, 160,000,000; Greek Church, 90,000,000; Brahmins, 220,000,000; Jewish, 7,000,000.

**Population.**—The population of the world is estimated at 1,500,000,000.

**The English language** heads the list with the enormous vocabulary of 250,000 words. German comes next, with 80,000 words; then Italian, with 75,000; French, with 30,000; Turkish, with 22,500; and Spanish with 20,000.

**It has** been computed that the death rate of the globe is 68 per minute, 97,790 per day, or 35,717,790 per year. The birth-rate is 70 per minute, 110,800 per day, or 36,817,200 per year, reckoning the year to be 365½ days in length.

#### TRADE AND MANUFACTURE.

**Iron steamships** were first built in Great Britain in 1843.

**The biggest casting** ever ordered was a propeller shaft for a steamer. It weighed over 60 tons, and was cast in Pennsylvania.

**The first locomotive** was constructed in 1814 by George Stephenson, and travelled at the rate of six miles an hour.

**Bells.**—The largest bell in the world is the famous Moscow bell, cast in the 16th century, to ring which required the combined efforts of 24 men. In 1706 it fell, breaking a piece out of the side, 7 feet in height, and weighing 11 tons. The bell was 26 feet high, 68 feet in girth, 2 feet thick, and weighed 186 tons. The next in size is a Burmese bell, weighing 117 tons.—Big Ben, London, weighs 14 tons.

**Dates of Great Inventions.**—The air-brake was invented by Westinghouse in 1874; the torpedo, by Bushnell, in 1777; watch, by Peter Hele, 1477; thermometer, by Drebbel, 1609; telescope, by Lipperheim, 1608; printing, by Gansfleisch, 1438; microscope, by Jansen, 1590; lithography, by Senefelder, 1798; lightning-rods, by Franklin, 1752; gunpowder, by Schwartz, 1320; balloon, by Montgolfier, 1783; barometer, by Torricelli, 1643.

#### VELOCITY.

**Sound** travels at the rate of 740 miles an hour.

**A rifle ball** travels at the rate of 1,000 miles an hour.

**Light** travels at the rate of 186,000 miles per second.

**Electricity** in aerial wire travels at the rate of 22,374 miles per second.

#### WAR.

**The Crimean War** cost England £32,793,303.

**The American Civil War** cost £740,000,000 and 655,000 lives.

**The Franco-Prussian War** cost £316,000,000 and the loss of 290,000 men.

**The greatest battle** of modern times was that of Leipsic, fought, on October 16, 1863. Napoleon had 190,000 men, and the Allies 290,000. The total loss of the two armies was 106,000 men.

**The greatest surrender** in the annals of war was that of Metz, on October 27th, 1870. The surrender included 3 field-marshal, 66 generals, 6,000 officers of lower degree, and 173,000 rank and file; there were also over 400 guns, 100 mitrailleuses, and 60 standards.

**Great sieges.**—The great sieges of the world during the 19th century are—1813, Danzig 335 days, total loss both sides 22,500 men; 1854-5, Sebastopol, 339 days, loss 156,670 men; 1870, Metz, 65 days, loss 25,800 men; 1870-1, Paris, 132 days, loss 36,200 men; 1877, Plevna, 94 days, loss 27,000 men. The siege of Port Arthur, 1904-5, lasted 235 days, with a total loss on both sides of 110,000 men.

[Established 1872.]      THE      [Established 1872.]

UNDERTAKING

# **Thos. Garland**

HAVING the Largest and Most Complete Plant in the District, is in a position to **Conduct Funerals Carefully and Punctually.** A Large Variety of Shrouds, Wreaths, Memorial Cards, Mottoes, &c., always in stock. Having recently imported a Large Stock of Coffin Mountings, Trimmings, &c., he is enabled to **CONDUCT FUNERALS CHEAPER** than any other establishment in town. Orders by 'Phone or Telegraph punctually attended to. **Office Open Night and Day** on the Premises or at the Private Residence, George-street.

**Estimates Given** for Headstones, Monuments, Copings and Railings for Grave Enclosures.

## **FURNITURE.      ✨      FURNITURE.**

A Very Large Stock of Every Description kept.

**Furniture Made to Order. Pictures Framed**—A Large Variety of Picture Mouldings to choose from.

**VENETIAN BLINDS MADE AT BRISBANE PRICES.**  
**SEND FOR PRICE LIST.**

## **THOS. GARLAND, Bourbon Street, Bundaberg.**

*Between M. A. Paterson's and Cullinanes Ltd.*

**Main Street, CHILDERS, and MOUNT MORGAN.**

Telephone No. 115.

Private Residence 123.

## LETTERS—Rates of Postage, General Regulations, &c.

The rates of postage on letters posted in Queensland are—

For delivery within the State—From the post office at which they are posted, and within the limits of the town delivery, 1d. for each  $\frac{1}{2}$ -oz. or fraction thereof.

From any other post office than that at which posted, and beyond the limits of town delivery, 2d. for each  $\frac{1}{2}$ -oz. or fraction thereof.

For any place within the Commonwealth, New Zealand, Fiji, and British New Guinea, 2d. for each  $\frac{1}{2}$ -oz. or fraction thereof.

For any place beyond the Commonwealth, except those above mentioned, 2½d. for each  $\frac{1}{2}$ -oz. or fraction thereof.

## LETTER POSTAGE RATES.

TOWN.	INLAND AND INTER-STATE AND TO UNITED KINGDOM.	FOREIGN.
Not exceeding—	Not exceeding—	Not exceeding—
$\frac{1}{2}$ oz. ... .. 1d.	$\frac{1}{2}$ oz. ... .. 2d.	$\frac{1}{2}$ oz. ... .. 2½d.
1 oz. ... .. 2d.	1 oz. ... .. 4d.	1 oz. ... .. 5d.
1½ oz. ... .. 3d.	1½ oz. ... .. 6d.	1½ oz. ... .. 7½d.
2 oz. ... .. 4d.	2 oz. ... .. 8d.	2 oz. ... .. 10d.
And so on at the rate of 1d. for every additional $\frac{1}{2}$ oz.	And so on at the rate of 2d. for every additional $\frac{1}{2}$ oz.	And so on at the rate of 2½d. for every additional $\frac{1}{2}$ oz.

The town rate of postage includes a radius of three miles from Post Office.

Letters not fully prepaid, or posted wholly unpaid, will be charged double the deficiency on delivery.

**Late Letters** and packets may be posted 15 minutes after the time appointed for closing the mail at the post office; they may also be posted on board steamers, or in the boxes provided at the principal railway stations; and at stations where boxes are not provided, such letters may be handed to the guards or station-masters. All late letters and packets for delivery within the Commonwealth must have a late fee of 1d. affixed in addition to the ordinary postage; and those for places beyond the Commonwealth must bear one single rate in addition to the ordinary postage. Late letters and packets posted at any post office without late fee affixed will be detained until the following mail, but those sent by railway or steamer will be delivered on payment of the late fees.

**Registration.**—The registration of an article renders its transmission much more secure, the loss of a registered article being a rare occurrence. The public are advised to register all articles containing anything of an important nature, and when sending bank notes, drafts, &c., to take note of the numbers and other particulars. Articles for registration should on no account be dropped into a posting-box, but must be presented at a post or receiving office during office hours, and a receipt on proper form obtained. Where a postmaster has cause to believe that any unregistered letter or packet contains any valuable enclosure other than money orders, bills of exchange, acceptances, promissory notes payable to order, cheques, postal notes, or postage stamps not exceeding five shillings in value, such postmaster may register such letter or packet, and charge it with double the prescribed fee for delivery, unless such person, before delivery, opens the letter in the presence of some officer of the post office, and it is found not to contain any valuable enclosure, in which case such fee shall not be charged.

**Stamps.**—The following are the denomination of postage stamps:— $\frac{1}{2}$ d., 1d., 2d., 2 $\frac{1}{2}$ d., 3d., 4d., 5d., 6d., 9d., 1s., 2s., 2s. 6d., 5s., 10s., 20s.

**Post Cards**, impressed with the 1d. stamp, may be transmitted to places within the Commonwealth, New Zealand, Fiji, British New Guinea and the United Kingdom, and may also be forwarded to places other than those mentioned, provided that an extra  $\frac{1}{2}$ d. stamp be affixed to it.

### PACKETS.—Postage Rates and Regulations.

BOOKS.		PRINTED PAPERS AND SAMPLES.	COMMERCIAL PAPERS.	
Inland and Inter-State.	Foreign.	All Places.	Inland and Inter-State.	Foreign.
Not exceeding—	Not exceeding—	Not exceeding—	Not exceeding—	Not exceeding—
4 oz. ... 1d.	2 oz. ... 1d.	2 oz. ... 1d.	2 oz. ... 1d.	2 oz. ... 3d.
8 oz. ... 2d.	4 oz. ... 2d.	4 oz. ... 2d.	4 oz. ... 2d.	4 oz. ... 3 $\frac{1}{2}$ d.
12 oz. ... 3d.	6 oz. ... 3d.	6 oz. ... 3d.	6 oz. ... 3d.	And so on up to 10oz.
			8 oz. ... 4d.	beyond that 1d. for
And so on.	And so on.	And so on.	And so on.	every 2 oz. up to 5
				lbs.

Packets may consist of Commercial Papers, Printed Papers, Patterns, Samples, and Merchandise. Commercial Papers include all papers and documents *not wholly printed*, which have not the character of actual or personal correspondence, such as accounts, invoices, receipts, bills of exchange, drawings, specifications, etc. A packet containing a mixture of commercial and printed papers shall be treated as if the whole were commercial papers. Any writing in the nature of a letter or personal communication is not permissible, and if any such writing appear on the article it may be charged as an insufficiently prepaid letter.

Printed papers include all printed matter (except newspapers), such as books, magazines, pamphlets, music sheets, visiting cards, address cards, circulars (wholly printed), proofs of printing, engraving, photographs, albums containing photographs, pictures, drawings, plans, maps, catalogues, prospectuses, announcements, and similar articles. All printed matter with written additions, corrections or alterations must be sent as Commercial Papers, but writing in the nature of a letter or personal communication is not permissible; if any such writing appear on the article it may be charged as an insufficiently prepaid letter.

Patterns, Samples and Merchandise.—The following and similar articles may be forwarded :—Glass, merchandise, mineral specimens, natural history specimens, liquids, oils, ointments, dry powders, paper, parchment or vellum, patterns, live bees, and live but harmless entomological specimens, samples, seeds, wedding cake (securely packed), celluloid. Patterns and samples may contain the name and commercial style of the sender, address of the person for whom they are intended, manufacturer's trade mark, numbers, prices, indications relative to weight, measurement and dimensions, quantity to be disposed of, or such as are necessary to determine the origin and nature of the goods.

The pattern and sample post to the United Kingdom shall be restricted to *bond fide trade patterns or samples of merchandise*. Packets containing goods for sale, or in execution of an order (however small the quantity), or any articles which are not actually patterns or samples, may not be forwarded by pattern and sample post.

The maximum weight for a packet of Commercial or Printed Papers shall be 5lb.; for Patterns, Samples and Merchandise, 1lb. No packet may exceed 2 feet in length, or 1 foot in depth or breadth, or if in a roll 2 feet 7 inches in length, or be of an inconvenient form.

Wholly unpaid or insufficiently prepaid packets posted in the Commonwealth for delivery therein may be forwarded charged with double the deficiency.

Packets containing jewellery or other valuable enclosures must be registered. Bank notes, coin or gold may be sent only at letter rates of postage, and must be registered. Glass must be securely packed in a way to prevent danger to mails.

### NEWSPAPERS.—Postage Rates and Regulations.

WITHIN COMMONWEALTH AND NEW ZEALAND.	Fiji.	UNITED KINGDOM AND FOREIGN.
All newspapers printed within the Commonwealth, posted by register'd newspaper proprietors or news-vendors for delivery therein, 1d. per 20 ozs. on aggregate weight posted at one time. Other newspapers printed within Commonwealth for delivery therein and New Zealand, each 3d. per every 10 ozs. or fraction thereof.	Each newspaper printed within Commonwealth—half-penny per every 2 ozs. or fraction thereof.	Each newspaper printed within Commonwealth not exceeding 8oz. 1d., per every additional two ounces or fraction thereof one halfpenny.

Newspapers not exceeding 16 oz. in weight, one penny by long sea route.

A newspaper may be sent either with or without cover, but must be open at both ends, and there shall not be in or upon any such newspaper or cover thereof any communication, character, figure, letter or number (other than the words "newspaper only"); nor shall anything other than a supplement be enclosed in or with such newspaper, otherwise it will not be transmitted or delivered.

If a newspaper addressed to any place within the Commonwealth be found by any officer of the Department to contain writing or any illegal enclosure, it must be forwarded by him, with a report of the circumstances, to the Deputy Postmaster-General; but any such newspaper posted at a place beyond the Commonwealth shall be sent to the Dead Letter Office.

Collected numbers of a newspaper shall not be transmitted through the post as a single newspaper, but postage must be paid on each copy contained therein.

If newspapers be posted wholly unpaid they shall not be forwarded; if insufficiently prepaid they will be sent to destination charged double the deficiency.

ISLAND.	INTER-STATE.	UNITED KINGDOM.
Not exceeding— s. d. 1 lb... .. 0 6 2 lb... .. 0 9 3 lb... .. 1 0 4 lb... .. 1 3 And so on at the rate of 3d. per lb. up to 11 lb.	Not exceeding— s. d. 1 lb... .. 0 8 2 lb... .. 1 2 3 lb... .. 1 8 4 lb... .. 2 2 And so on at the rate of 6d. per lb. up to 11 lb.	Not exceeding— s. d. 1 lb... .. 1 0 2 lb... .. 1 6 3 lb... .. 2 0 4 lb... .. 2 6 And so on at the rate of 6d per lb. up to 11 lb.

Parcels not exceeding 11 lbs. in weight, 3ft. 6in. in length, or 6ft. in length and

girth combined, will be accepted for transmission from and to all Parcel Post Offices in the Commonwealth, served by rail, coach, or steamer. Parcels from or to offices not served by rail, coach or steamer must not exceed 3lb. in weight. Should a parcel be received exceeding that weight addressed to a place to which it is not transmissible, it will be forwarded to the nearest Parcel Post Office on the mail route served by rail, coach or steamer, and the addressee duly advised thereof.

Parcels intended for transmission must be handed in at a Parcel Post Office, and the officer to whom it is handed must check the weight, size and postage before accepting it; if not fully prepaid, or exceeds the limit of weight and size, it will not be accepted. Should an article, which is transmissible through the post only as a parcel, be posted in a posting-box instead of being handed in at a Parcel Post Office in the prescribed manner, it will be regarded as irregularly posted, and if not exceeding 1lb. in weight will be forwarded as a letter or packet. Postage must be fully prepaid by means of postage stamps, which must be affixed close to the address on the wrapper, or to a label, obtainable at any Post Office.

### Private Letter Boxes.

Private Boxes may be rented at the Post Office, on payment in advance, of a fee of £1 per annum; payment must be so arranged that renewal fees fall due on 1st January in each year, new subscribers to pay proportion of fee at annual rate from 1st day of quarter in which they commence to end of December following. Two keys will be supplied with each box, but 1s. will be charged for each additional key supplied, *and keys must not be obtained elsewhere than from the Department.* All keys must be returned at once to the Postmaster on relinquishing the use of a box, otherwise the rental fee will be charged until they are returned. If a key be lost, information must at once be given to the Postmaster, and the remaining key or keys returned, when a new lock, for which a charge of 5s. will be made, will be fixed in the box, and two keys supplied.

### MONEY ORDERS.

The safest way to send small remittances is by money order. If a letter containing a money order should go astray, the money may be obtained by means of a duplicate order. The money order system also affords facilities for the rapid transmission of remittances by means of telegraph money orders. The rates of commission chargeable for the issue of money orders are:—

If payable in—	For sums—									
	Not exceeding £2.	Exceeding £2, but not exceeding £5.	Exceeding £5, but not exceeding £7.	Exceeding £7, but not exceeding £10.	Exceeding £10, but not exceeding £12.	Exceeding £12, but not exceeding £15.	Exceeding £15, but not exceeding £17.	Exceeding £17, but not exceeding £20.		
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
The Commonwealth ... ..	0 6	0 6	1 0	1 0	1 6	1 6	2 0	2 0	2 0	2 0
New Zealand and Fiji ... ..	0 6	1 0	1 6	2 0	2 6	3 0	3 6	4 0		
Papua (New Guinea) ... ..	9d. per £5, or fraction of £5, up to £20.									
United Kingdom, other British Possessions, and Foreign Countries ... ..	6d. for each pound or fraction of a pound.									

The hours of issuing and paying money orders are—Daily, 9 a.m. to 5 p.m.

The maximum amounts for which single money orders may be issued are:—Orders payable in the Commonwealth—United Kingdom, £40; United States of America, £20; British North Borneo, £40; Mauritius, £40. Two or more orders may be obtained when it is desired to remit large amounts. No order may contain a fraction of a penny.

### POSTAL NOTES.

Postal Notes are sold and paid at all money order offices during the hours they are open for money order business. The following are the denominations of Postal Notes and the fee or poundage charged for them :—

S.	D.		D.	S.	D.		D.	S.	D.		D.
0	6	...	$\frac{1}{2}$	3	0	...	1	7	6	...	2
1	0	...	$\frac{1}{2}$	3	6	...	1	10	0	...	3

2	0	...	1	4	6	...	1	15	0	...	3
2	6	...	1	5	0	...	$1\frac{1}{2}$	20	0	...	3

The notes are payable throughout the Commonwealth.

## TELEGRAPHIC INFORMATION.

The Telegraph Office is open from Monday to Friday (public holidays included) from 9 a.m. to 6 p.m., also 8 to 9 p.m.; Saturday, 9 a.m. to 6 p.m. Sundays, Christmas and Good Friday, 7.30 p.m. for urgent business.

Prepaid telegrams may be dropped into the box provided at each station, at any time when the office is closed, and will be transmitted when business is resumed. Such telegrams, with full fee, must be enclosed in sealed envelopes; if full fee is not enclosed the telegram will be forwarded, but the addressee will be required to pay, before delivery, the amount short paid, together with cost of instructions to the delivery office to collect deficiency.

### Scale of Charges.

Town and Suburbs, or within 15 miles of sending station—Including address and signature, not exceeding 16 words, 6d.; each additional word 1d.

Other places within the State—Including address and signature, not exceeding 16 words, 9d.; each additional word, 1d.

From any one State to any other State (including Tasmania)—Including address and signature, not exceeding 16 words, 1s.; each additional word, 1d. Urgent and Sunday telegrams double the ordinary rate. Ordinary telegrams are charged double rate after 8 p.m.

New Zealand—Each word (address and signature counted),  $4\frac{1}{2}$ d. New Caledonia, each word, 9d. Urgent telegrams—Treble the ordinary rate.

Telegrams will be delivered free of charge within a radius of one mile, and on payment of 3d. if beyond one mile and within  $1\frac{1}{2}$  mile from office of destination, provided messengers are attached to that office. Beyond  $1\frac{1}{2}$  mile delivery, expenses will be charged. Senders of telegrams must give every information to officers that will facilitate delivery; if they omit to do so it is at their own risk. When the place to which a telegram is to be delivered is beyond the  $1\frac{1}{2}$ -mile radius, and no portorage has been paid, the telegram may be posted from the office. Mileage is charged on distance to place of delivery; no charge for return journey.

## TELEPHONE CHARGES.

All telephone lines, instruments and fittings in connection with the telephone system, except where otherwise provided by these Regulations, shall be erected and supplied by the Postmaster-General, the cost being borne by the Government, and no persons, except employes of the Department, provided with proper means of identification, are to be allowed to interfere with or make any additions or alterations to any wires, instruments, or fittings under the Department's control. In the event of any such interference the subscriber concerned will be liable to have his line disconnected.

The following shall be the charges payable for each of the different classes of service specified :—

From 1 to 10,000—Within 5 miles of exchange, exclusive service, £3; two-party service, £2 10s.; three-party service, £2.

From 10,001 to 100,000—Within 10 miles of exchange, exclusive service, £3 10s.; two-party service, £2 15s.; three-party service, £2 5s.

From 100,001 upwards—Within 10 miles of exchange, exclusive service, £4; two-party service, £3; three-party service, £2 10s.

For the foregoing charges the Postmaster-General will provide and maintain all necessary exchange equipment, subscriber's line not exceeding two miles in length radially, and one telephone wall-set per subscriber.

For all effective calls the subscriber will be charged at the following rates :—

For calls not exceeding 2,000 half-yearly, two calls for one penny.

For calls above 2,000 half-yearly, three calls for one penny.

Fractions of a penny will be charged as one penny.

No charge will be made to the subscriber for calls received by him.

Calls made on the business of the Postmaster-General by any duly authorized officer will not be charged.

Accounts for calls will be rendered half-yearly, and must be paid within four teen days. A statement of account certified by a responsible officer of the Department as being correct shall be accepted as *prima facie* evidence of the number of effective calls originated by the subscriber.

## Income Tax.

Subject to the "Income Tax Acts of 1902 to 1906," there shall be charged levied, collected, and paid for the use of His Majesty in aid of the Consolidated Revenue for each year an income tax in respect of the annual amount of the incomes of all persons at the rates following, that is to say—

**On all income derived from personal exertion—**

If the total income subject to the tax does not exceed £500—6d. in each and every pound.

Exceeds £500 and does not exceed £1,000—6d. in each and every pound of the first £500, and 7d. in each and every pound over £500.

Exceeds £1,000 and does not exceed £1,500—7d. in each and every pound of the first £1,000, and 8d. in each and every pound over £1,000.

Exceeds £1,500—8d. in each and every pound.

**On all income derived from the produce of property—9d. in each and every pound**

Provided that a person, not being a company or an absentee, whose total income, whether derived from personal exertion or from the produce of property, or partly from personal exertion and partly from the produce of property, during the year in respect of which the assessment is made, did not amount to £200 shall not be liable to tax.

In respect to any person, not being a company or an absentee, whose total assessable income, whether derived from personal exertion or from the produce of property or partly from personal exertion and partly from the produce of property, during the year in respect of which the assessment is made, amounted to more than £200, then £200 of such income shall not be deemed to be part of the total income subject to tax, and accordingly shall be exempt from tax, and in deducting such £200 the income from personal exertion, if any, shall be first resorted to.

**On the incomes of all companies and of all absentees on the total income subject to the tax—1s. in each and every pound.**

# Winters & Reinhardt

## BUNDABERG'S LEADING BUTCHERS.

Bourbon St., and Corner Curtis and Hunter  
Streets, Bundaberg.

They have won their way to popular favour with the public by the sterling merit of their

### Meat, Pork, Mutton, and Veal,

Which cannot be excelled in  
Quality.

Did you say something about

### SMALL GOODS?

Well, take my tip, you know nothing about the Deliciousness of Small Goods unless you have sampled the supplies of

### Winters & Reinhardt.

I tell you, and the Bundaberg public will back up the statement

that you cannot get anything to equal them in town.

Then take my advice and place your next month's order with this firm, and I am sure you will be more than satisfied with the result.

# Winters & Reinhardt,

## ✦ DENTISTRY. ✦

Modern Methods have altered things. The laborious old style of making sets, extracting, filling, and crowning, have been superseded by Labour-saving Dentistry.

We have fitted our Surgeries and Workrooms with all that is modern in American and Continental Dentistry; thus we guarantee that you will be saved many hours in the dental chair, that your teeth will be ready for use sooner, and be neater and more serviceable than those treated or supplied by many town dentists.

**O. J. GRUTER,** Bundaberg's  
Painless Dentist.

Targo St. (opp. Grand Hotel). Bundaberg.
